146.99€

Freewell Sunshield for Fuji X100 Series (silver)

The Freewell Sunshield for Fuji X100 Series offers lens protection and a built-in CPL/Black Mist filter (49mm). The polarizing filter reduces glare and improves color saturation, which works well for landscape photography, among other applications. The Black Mist effect softens light and is perfect for portraits and city shots.

Quick adjustment and easy filter replacement

The CPL ring used makes it possible to adjust the filter quickly and conveniently - just rotate it with two handles. The hood itself can be easily opened and the filter can be replaced without complete disassembly. The system is compatible with other 49mm diameter filters.
