

Eyepiece AR RayNeo Air 3s

Modelis: XRGF35-2A4FEU1

Gamintojas: RAYNEO

EAN: 6976972040112

Prekės kodas: 375826

279.99€

RayNeo Air 3s AR Glasses

RayNeo Air 3S are distinguished by their micro-OLED HueView™ display and OptiCare™ technology for eye protection. What's more, they offer 120 Hz refresh rate and surround sound with acoustic chambers and advanced isolation from the environment. With RayNeo Air 3S, you'll turn your smartphone, tablet or console into a giant screen, while privacy and AR 3D features let you enjoy your media wherever you are - with maximum comfort and security.

A breakthrough in image quality

RayNeo Air 3S uses the revolutionary HueView™ micro-OLED display, which offers up to 98% coverage of the DCI-P3 gamut, resulting in an incredibly wide and realistic color range. With a color accuracy of $\Delta E 2$, every hue is faithfully reproduced. The 200,000:1 contrast ratio allows you to see the finest details in both deep blacks and bright areas of the image, and the 201" virtual screen guarantees full immersion in the world of games, movies and series, just like on a real cinema screen.

OptiCare™ technology

OptiCare™ takes care of the comfort of your eyes. The use of 3840 Hz DC and PWM dimming almost completely eliminates image flicker, significantly reducing eye fatigue during prolonged use. With 20 brightness levels, you can fine-tune the light intensity to suit your environment. TÜV SÜD certification confirms low blue light emissions and no flicker, making even long-hour sessions in front of the screen safe for your eyesight.

3 modes of operation

RayNeo Air 3S lets you choose from 3 modes. Game with 120 Hz refresh rate minimizes lag for smooth and responsive gameplay, while boosting color saturation to make the gaming environment as realistic as possible. In Movie mode, optimization algorithms dynamically adjust contrast and white balance to bring out the full detail in cinematic scenes, while maximum brightness and black depth create exceptional effects. Standard, on the other hand, is designed for everyday tasks - browsing the Internet, reading documents or multitasking - and optimizes display parameters to reduce eye fatigue with neutral colors and moderate brightness.

Best set for gamers

The JoyDock is a docking station designed specifically for the Nintendo Switch - it allows you to attach the console directly to RayNeo glasses and turn them into a portable, personal screen. The built-in 10,000 mAh powerbank not only powers the glasses, but can also charge the console itself, meaning you don't have to worry about time constraints during intense sessions.

High quality sound

RayNeo Air 3S features 2 opposing acoustic chambers that have been precisely calibrated - you'll hear deep bass and clear, ear-pleasing mids and highs. As a result, you won't miss a step of your opponent, you'll gain an edge in games and become even more immersed in the virtual world.

Privacy

The unique design of the RayNeo Air 3S blocks as much as 99.6% of external light, so no one will be able to see what you're currently displaying - even sitting right next to you. Whisper 2.0 mode transmits sound only to your ears, using directional audio projection technology to prevent sound from spreading to the sides.

Wired connection

RayNeo Air 3S allows you to instantly transform your smartphone, tablet or laptop into a giant portable screen. Simply connect your device with a USB-C or HDMI cable. Edit documents and presentations with high precision, watch videos, view photos and participate in video conferences in a whole new dimension.

Rediscover memories

Using advanced AR algorithms, RayNeo Air 3S brings your 3D photos and videos to life, creating spatial images that surround you like holograms. View your holiday snapshots from different angles, immerse yourself in footage of highlights and feel like you're there again.

Included

- AR glasses
- data cable
- nose pads
- storage case
- cleaning cloth for glasses
- instruction manual
- frame for corrective lenses (sample)
