Modelis: EY1B013

Gamintojas: ENDORFY

EAN: 5903018667287

Prekės kodas: 37585

58.99€

It takes so little to be heard. We're serious, and we have strong evidence of that – the Solum Voice S easily fits into backpacks and ensures sound as clear as if you and your interlocutor were sitting in the same room. Except that our microphone has a touch mute button built in, so you can mute yourself at any time.

You can also turn up the microphone sensitivity – that's what the GAIN knob is for ;)

Solum Voice S

Solum Voice S is your new mic for streaming, chatting and podcasting. It takes up very little space to make room for vlogging, dragon hunting or recording. It also works well with ENDORFY microphone arms, so if you like using body language while chatting, you'll get along in no time.

We've created Solum Voice S with a view of all those who care about good sound pickup and comfortable use. The former is provided by adequately designed and tuned components. The latter – by a mute touch button, GAIN knob and headphone jack output. And thanks to cardioid characteristics our Solum Voice S beautifully captures your voice at the front of the microphone.

Pssst... There's also backlight, because we like RGB.

Size does not matter

Apparently, size doesn't matter. But when it comes to your creative space, every centimeter is of great importance. That's why we've made sure the Solum Voice S charms with a small format and compatibility with ENDORFY microphone arms. You're welcome ;) It also takes up very little space to fit backpacks, desks and comfortably even on small desks. On top of that, Solum Voice S has a good surface grip and is compatible with all ENDORFY microphone arms. Simply put – you can set up this bad boy just the way you like it.

We need to talk

When it comes to Solum Voice S, you always need to talk. Either you're recording a podcast, calling your boss or defeating some dragons with besties – you can count on our microphone. Simply put, perfect sound quality on any occasion is our (and Solum's) priority objective. The Solum Voice S works in cardioid mode. In practice, this means that our microphone picks up sound mainly at the front as if you were in the same room with your interlocutor. In addition, the microphone has a jack output, so – after long hours at the home office – you can plug in headphones and use them as monitor or quickly dive into your favorite music.

Everything at hand (literally!)

If we had to sum up the Solum Voice S in one sentence, we'd say that it has everything you need, and you have it at hand (literally!). Seriously – you can control the sensitivity of the microphone and adjust the sound to get the best quality. Something tells us that your interlocutors will thank you for it (ours did this a long time ago). Solum Voice S also has two foam filters – an internal one and one applied directly to the microphone (which is UNIQUE, considering its shape!) with a slot for mute touch button, with which you can silently escape mute yourself during a conversation.

Ready to go talk

It's no secret that we have a thing for backlight, and the colored rim around GAIN knob on the Solum Voice S only confirms this. We gave you several colors to choose from (and conveniently switch) - just click the knob and you're ready to go talk.
