Anycubic Kobra 3 Max Combo 3D Printer

Modelis: KMCB-IP-O

Gamintojas: ANYCUBIC

EAN: 6974662351074

Prekės kodas: 375942

746.99€

Anycubic Kobra 3 Max Combo 3D Printer

Anycubic Kobra 3 Max Combo is a state-of-the-art 3D printer designed for creatives who need a large workspace, precision and speed. Thanks to its innovative technologies and smart features, the device enables even the most demanding projects, regardless of their size. It is the ideal solution for both professionals and 3D printing enthusiasts. In addition to the add-ons, the Combo version offers flawless multi-color printing in up to 8 colors, which opens up new possibilities in model creation.

ACE Pro

One of the key features of the Combo version is the ability to print in up to 8 colors simultaneously, thanks to the ability to connect two ACE Pro systems. This intelligent solution automatically manages the filaments, precisely changing them as you go, eliminating the need for manual material changes. In addition, it also acts as an advanced filament box, taking care of their proper storage conditions. The built-in drying system effectively protects the material from moisture, resulting in better print

quality and less risk of problems during printing.

Spacious workspace

One of the key advantages of the Anycubic Kobra 3 Max is its huge print space of 420 x 420 x 500 mm. It allows the creation of large models in a single run, eliminating the need to combine smaller parts. This is perfect for those doing architectural projects, industrial prototypes or decorative elements.

Unmatched speed and performance

The printer achieves a maximum print speed of 600 mm/sec, which, combined with acceleration up to 10,000 mm/sec^2, significantly reduces project turnaround time. The advanced LeviQ 3.0 system enables automatic leveling of the work table, and the Anti-Step Lost function prevents layers from skipping, resulting in exceptionally precise and stable prints.

Precision at every stage

The Cobra 3 Max is equipped with a quick-connect Hotend, enabling printing at temperatures up to 300°C. The hotplate heats up to 90°C in just 125 seconds, speeding up the start of work. Thanks to the improved location of the filament cutter and an anti-entanglement system, users can focus solely on completing their projects.

Spacious

The printer uses advanced systems such as resonance compensation and dynamic flow, which eliminates vibration and provides even greater printing accuracy. Two Y-axis motors with double core shafts and SG15 bearings eliminate layer misalignment, and a Z-axis motor with a double screw increases design stability.

Automation and safety

Thanks to its artificial intelligence tangle detection function, the Kobra 3 Max immediately stops printing if there is a problem with the filament. The automatic recharging and intelligent material

drying system ensures optimal conditions for every print, and the ability to print in 4 or 8 colors (second ACE Pro system on separate sale) allows for more complex projects.

Easy operation and software support

Anycubic Kobra 3 Max works with the intuitive Anycubic Slicer Next, based on the Orca platform. The Anycubic APP allows remote control, real-time progress monitoring and time-lapse photography. In addition, LAN mode and Wi-Fi support make it easy to integrate into a home or business network.

Rich set of accessories

The combo version includes everything you need to get started. In addition to the printer and ACE Pro module, the kit includes a touchscreen, print head, spooler holder, power cords, cable organizer, signal cable and mounting accessories. In addition, a set of tools is included, including wrenches, nozzle cleaner and grease, making ongoing maintenance of the device easy.

Included

- Printer frame
- Base housing
- Print head
- Touchscreen
- Spool holder
- Cable holder
- ACE Pro
- Kit 1- For frame mounting
- Kit 2 - For mounting the support rods
- Kit 3 - For printhead cable
- Kit 4 - For printhead installation
- Kit 5 - For screen installation
- Kit 6 - For installation of spool holder
- Power cord (2 pcs)
- Cable organizer (6 pcs)
- Signal cable (1 pcs.)

- U-disk (1 pc.)
- Filament tube (5 pcs.)
- Allen wrench set
- Test filament (approx. 10 m)
- Nozzle cleaning tool
- Lubricant
- Set of wrenches

Manufacturer	Anycubic
Model	KMCB-IP-O
Print volume	420*420*500mm
Touch screen	4.3-inch
Maximum print speed	600mm/second
Maximum acceleration	10000mm/s²
Nozzle diameter	0.4mm (0.2/0.6/0.8mm available)
Auto-leveling	LeviQ3.0 Auto-leveling
Benchy printing	17 min 18 min
Noise	60dB (standard mode)
X axis motors	Dual core shaft + SG15 bearing
Y axis motors	Dual core shaft + SG15 bearing + Dual motor
Z axis motors	Double motor double screw
Maximum nozzle temperature	300°C
Maximum hotplate temperature	90°C
Belt tension	Automatic
Quick-connect hotend	Yes
LAN mode	Support
WiFi	Support

Application control	Support
Cutting software	Anycubic Slicer Next, external
Automatic resume	Support
AI detection	AI spaghetti detection, Object skipping (requires camera)
Resonance Compensation	Support
Dynamic flow compen	Support
Device weight	19 kg ACE Pro: 4.6 kg
Device dimensions	706 x 640 x 753 mm
Dimensions of ACE Pro	365.94 x 282.84 x 234.5mm
Printing speed	Recommended speed 300 mm/s; maximum speed 600 mm/s
Construction platform	PEI spring steel
Material	Kobra 3 Max supports PLA, PETG, ABS and TPU. ACE PRO supports PLA, PETG, ABS, ASA, PET, PA, PC, PP, HIPS.
Power supply	300W
Connection method	Wi-Fi, AC Cloud, local network
Cooling fan rotation	7000 RPM.
Multi-color printing	Supports printing in 4 or 8 colors

Printing speed (mm/s): 600, Printer type: FDM , Gross weight: 28000, Net weight: 23600, Box length: 102,00, Box width: 73,00, Box height: 30,50, Information about data generation: https://dataact.innpro.pl/anycubic/6974662351074
