

Okulary XR VITURE Luma Cyberpunk 2077 Edition

Modelis: LM-Cyb-Glas

Gamintojas: VITURE

EAN: 1230000282109

Prekės kodas: 376253

649.00€

XR Glasses VITURE Luma Cyberpunk 2077 Edition

VITURE Luma Cyber Edition are advanced XR glasses that combine powerful display, sound and connectivity in a compact, ergonomic form factor. Featuring the latest MicroOLED panel from Sony, they offer a virtual screen as large as 152" with a refresh rate of 120 Hz and brightness of up to 1,500 nits. The Cyber edition was created in collaboration with CD PROJEKT RED to celebrate the 5th anniversary of the Cyberpunk 2077 game, and its design is subtly reminiscent of the Night City aesthetic - with a translucent frame and neon accents.

MicroOLED 4K display with spatial depth

Each lens has a separate 1920x1200 panel, which collectively delivers impressive quality with more than 100% sRGB coverage and a contrast ratio of 100,000:1. With Immersive 3D technology, the

glasses are able to transform a traditional 2D image into a deep, 3D effect in real time - ideal for both gaming and movie watching. The 3D function works without additional settings and supports most popular platforms - Windows, macOS, Android and iOS.

Wide compatibility and direct connection

The glasses are compatible with a wide range of devices, such as Steam Deck, ASUS ROG Ally, MSI Claw, Lenovo Legion Go, as well as the new Switch 2 console (using the VITURE Pro Mobile Dock). The direct USB-C connection eliminates lag and enhances the user experience, whether you're gaming on the go or watching a TV series in your home chair.

Comfort and fit for the user

Built-in myopia adjustment up to -4.0D allows you to use the device without corrective glasses. A system of interchangeable nose pads (3 sizes included) and a wearable sensor increase comfort even during longer sessions (suggested use time 3-4 hours). The whole set weighs only 83 g, and the design does not cause uncomfortable pressure on the temples.

Surround sound with HARMAN AudioEFX system

The built-in surround sound speakers, designed in cooperation with HARMAN, are responsible for the audio experience. A 9-level volume control system and a base frequency of 250 Hz \pm 50 provide natural, full sound without the need for additional headphones.

Smart filters and full immersion

Thanks to electrochromatic glass, the glasses automatically adjust transparency (from 0.5% to 40%) in just 0.1 seconds, blocking out outside light almost completely. This allows you to focus solely on the image - without interference.

Included

- XR glasses
- interchangeable nose pads (sizes 1/2/3) x3
