

Graphics Card GIGABYTE GeForce RTX 3050 WINDFORCE OC V2 8GB GDDR6

Modelis: GV-N3050WF2OCV2-8GD

Gamintojas: GIGABYTE

EAN: 4719331314798

Prekės kodas: 377590

286.00€ ~~301.99€~~

GIGABYTE GeForce RTX 3050 WINDFORCE OC V2 8G

The GIGABYTE GeForce RTX 3050 WINDFORCE OC V2 8G is engineered to deliver a powerful and efficient gaming performance. Built on the NVIDIA Ampere architecture, this card features dedicated 2nd generation RT Cores and 3rd generation Tensor Cores, providing a significant boost in ray tracing and AI-driven graphics. With 8GB of GDDR6 memory and a 128-bit memory interface, it ensures smooth gameplay for modern titles at high resolutions.

Advanced WINDFORCE Cooling System

To maintain optimal temperatures during intense gaming sessions, the WINDFORCE cooling system utilizes two 90mm unique blade fans. The alternate spinning technology reduces turbulence between adjacent fans, enhancing airflow pressure. The heatpipe directly touches the GPU to maximize heat dissipation, while the 3D Active Fan provides semi-passive cooling, keeping the system silent during low-load tasks.

Durability and Precision Engineering

This graphics card is built with Ultra Durable certified components, including lower RDS(on) MOSFETs, metal chokes, and solid capacitors for a longer lifespan and better system stability. The graphene nano lubricant extends the fan life by up to 2.1 times. Additionally, the fully automated production process ensures a smooth PCB surface, protecting your hands and components during installation.

Key Features:

- Powered by NVIDIA GeForce RTX 3050 with a 1792 MHz boost clock.
- 8GB GDDR6 128-bit memory for high-speed performance.
- WINDFORCE Cooling System with alternate spinning fans.
- Graphene nano lubricant for quieter and longer-lasting fans.
- Dual HDMI 2.1 and dual DisplayPort 1.4a outputs.
- GIGABYTE Control Center for intuitive performance tuning.

GIGABYTE is a world-leading brand in the IT industry, renowned for its high-performance hardware, innovative cooling solutions, and commitment to quality and durability in every component.

Order today from ++SHOP++ as we offer the best prices and fast delivery for all your gaming needs.

KEY FEATURE

NVIDIA Ampere Streaming Multiprocessors

2nd Generation RT Cores

3rd Generation Tensor Cores

Powered by GeForce RTX™ 3050

Integrated with 8GB GDDR6 128-bit memory interface

WINDFORCE Cooling System

90mm unique blade fan

WINDFORCE COOLING SYSTEM

The WINDFORCE cooling system features two 90mm unique blade fans, the heatpipe directly touches the GPU, alternate spinning and 3D active fan, which together provide high efficiency heat dissipation.

ALTERNATE SPINNING

Reduce the turbulence of adjacent fans and increase air pressure. GIGABYTE turns the adjacent fans in the opposite direction, so that the airflow direction between the two fans is the same, reducing the turbulence and enhancing the airflow pressure.

UNIQUE BLADE FAN

The airflow is spilt by the triangular fan edge, and guided smoothly through the 3D stripe curve on the fan surface, effectively enhancing the airflow.

3D ACTIVE FAN

The 3D Active Fan provides semi-passive cooling, and the fans will remain off when the GPU is in a low load or low power game. It allows gamers to enjoy gameplay in complete silence when the system is running light or idle.

GRAPHENE NANO LUBRICANT

Graphene nano lubricant can extend the life of fan by 2.1 times, close to the life of double ball bearing, and is quieter.

ULTRA DURABLE

ULTRA COOLING

Lower RDS(on) MOSFETs are specially designed to produce lower switching resistance for faster electric current charging and discharging at extremely low temperature.

LOW POWER LOSS

Pateikta prekės informacija yra orientacinio pobūdžio. Techninės savybės, nuotraukos, aprašymai ir kaina gali keistis be išankstinio perspėjimo. Gamintojas ir pardavėjas neatsako už galimus duomenų neatitikimus ar tipografines klaidas. Prieš įsigyjant rekomenduojame pasitikrinti aktualią informaciją.

Metal Choke hold energy much longer than common iron-core chokes at high frequency, thus effectively reduce core energy loss and EMI interference.

LONGER LIFE

Lower ESR Solid Capacitors ensure better electronic conductivity for excellent system performance and longer lifespan.

FRIENDLY PCB DESIGN

Fully automated production process ensures top quality of the circuit boards and eliminates sharp protrusions of the solder connectors seen on the conventional PCB surface. This friendly design prevents your hands from getting cut or inadvertently damaging components when making your build.

GIGABYTE CONTROL CENTER

GIGABYTE CONTROL CENTER (GCC) is a unified software for all GIGABYTE supported products. It provides an intuitive interface that allows users to adjust clock speed, voltage, fan mode and power target in real-time.
