

Graphics Card ASUS Dual Radeon RX 9060 XT White Edition 16GB GDDR6 (PCIe 5.0, Axial- tech Cooling)

Modelis: 90YV0LG3-M0NA00

Gamintojas: ASUS

EAN: 4711636203005

Prekės kodas: 377600

542.99€

ASUS Dual Radeon RX 9060 XT White Edition 16GB GDDR6 Graphics Card

The ASUS Dual Radeon RX 9060 XT White Edition delivers heavyweight graphics performance optimized for compact PC builds. Combining advanced thermal engineering with a versatile 2.5-slot design, this 16GB GDDR6 graphics card ensures efficient cooling and broad compatibility, making it the perfect choice for gamers seeking maximum power in a smaller chassis.

Superior Cooling and Quiet Operation

Designed to leverage chassis airflow, the 2.5-slot design accommodates two powerful cooling fans and a large heatsink array, ensuring thermal efficiency that exceeds its size class.

- **Axial-tech Fans:** Two refined Axial-tech fans utilize a smaller hub and a barrier ring to significantly increase downward air pressure onto the heatsink.
- **0dB Technology:** Enjoy silence during lighter tasks. The fans automatically stop when the GPU temperature drops below 55°C and power consumption is low, eliminating unnecessary noise.
- **Dual Ball Fan Bearings:** These bearings offer superior durability, lasting up to twice as long as traditional sleeve-bearing designs, ensuring long-term cooling stability.
- **Vented Backplate:** A strategically vented backplate significantly enhances heat dissipation, providing additional airflow to keep the GPU cooler during intense gaming sessions, boosting overall stability and longevity.

Engineered for Reliability

The ASUS Dual series is built using robust components and automated manufacturing processes to ensure maximum reliability and structural integrity.

- **Dual BIOS:** Customize your experience instantly. Choose Performance Mode for maximum cooling and lower core temperatures, or switch to Quiet Mode for a less aggressive fan curve and quieter operation at medium temperatures.
- **Auto-Extreme Technology:** This automated manufacturing process completes all soldering in a single pass, reducing thermal strain on components and guaranteeing a more reliable, high-quality product.
- **Structural Protection:** Features include an ASUS GPU Guard to reduce the risk of cracks, a protective backplate that reinforces the PCB and prevents flex, and a corrosion-resistant 304 Stainless Steel mounting bracket.

ASUS is a world leader in computer hardware, known for manufacturing high-performance graphics cards, motherboards, and gaming peripherals using cutting-edge technology and rigorous quality control.

Order today from ++SHOP++ as we offer the best deals and reliable delivery on professional gaming components.

Dual Fans, Perfect Fit

ASUS Dual Radeon™ RX 9060 XT White Edition combines powerful thermal performance with broad compatibility. Advanced cooling solutions from flagship graphics cards — including two Axial-tech fans for optimizing airflow to the heatsink. Designed in a compact 2.5-slot form factor, delivering more power in less space. These enhancements make ASUS Dual the perfect choice for gamers who want heavyweight graphics performance in a compact build.

Cooling

2.5-slot Design

A carefully designed shroud, heatsink, and heatpipe layout enables the two Axial-tech fans to leverage chassis side-panel ventilation, delivering thermal performance that beyond the compact size.

Axial-tech Upgrades

Two tried-and-true Axial-tech fans feature a smaller hub facilitates longer blades and a barrier ring to increase downward air pressure.

0dB Technology

To eliminate unnecessary noise, the stop mode automatically halts all fans when the GPU temperature drops below 55°C and power consumption is low.

Dual Ball Fan Bearings

Fan bearings come in different types, each with its own advantages. Dual ball bearings provide superior durability and can last up to twice as long as sleeve-bearing designs.

Vented Backplate

A vented backplate significantly enhances heat dissipation, helping to keep the GPU cooler during intense tasks. This additional airflow helps ensure optimal temperatures, boosting performance, longevity and stability by defending against overheating and thermal throttling.

Unmatched Reliability

ASUS GPU Guard

ASUS GPU Guard applies adhesive to secure all four corners to reduce the risk of cracks.

Protective Backplate

The PCB is reinforced by a backplate that adds structural rigidity, helping to prevent flex and to protect components and trace pathways from damage.

Stainless Steel Bracket

The mounting bracket of the Dual has been beefed up with 304 Stainless Steel that's harder and more resistant to corrosion.

Engineering

Dual BIOS

Do you prioritize lower core temperatures or quieter operation? Performance mode increases fan speed to keep the card running cool all the time. Quiet mode maintains the same power target and performance settings, but applies a less aggressive fan curve for quieter operation at medium temperatures. Want more control? Customize your experience with GPU Tweak III software for fine-tuned fan profiles and performance adjustments.

Auto-Extreme Technology

Auto-Extreme Technology is an automated manufacturing process that sets new standards in the industry by allowing completing all soldering to be completed in a single pass. This reduces thermal strain on components and avoids the use of harsh cleaning chemicals, resulting and minimizes in less environmental impact. The result is lower power consumption during manufacturing and a more reliable, high-quality product. lower manufacturing power consumption, and a more reliable product overall.
