259.99€

AURZEN Boom 3 Projector

The Aurzen Boom 3 is a versatile multimedia projector that combines an advanced audio system with high-quality Full HD images. Its compact housing conceals a 36-watt set of four speakers (2 full-range, 2 tweeters) supported by a bass membrane and Dolby Audio technology. This means you no longer need additional sound equipment to enjoy spacious, dynamic sound. The projector displays images in native 1080p resolution, with 4K content support and 500 ANSI lumens brightness, for a clear, vivid picture. In addition, the device runs on the webOS system, which allows you to use popular apps (Netflix, YouTube, Prime Video) without having to connect a laptop or TV box.

Full sound from four speakers

The projector is equipped with four sound transducers: two full-range speakers, two tweeters, and a bass membrane. This arrangement creates realistic, spatial sound that surrounds the viewer from all sides. The 2.2 channel system ensures that the sound reaches the listener directly, with powerful bass and better immersion in the action of a movie, game, or concert.

Different sound modes

Boom 3 offers several sound profiles – Sport, Music, Movies, and News. Each mode has been tailored to a specific type of content, making it easy to adjust the settings. In addition, DSP technology ensures clear sound without distortion – in both high and low frequencies.

1080p image quality with 4K support

The projector displays images in native Full HD resolution (1920 × 1080 px), with support for signals up to 4K. Thanks to HDR10 technology and 500 ANSI lumens brightness, you can count on vivid colors, good sharpness, and low noise levels – even in bright surroundings.

Automatic settings and quick start

Boom 3 starts up instantly and automatically adjusts the image with AI Auto Focus and keystone correction. It can also automatically adjust to the size and position of the screen and even avoid obstacles in the projection field. This means you don't have to set anything manually.

webOS system and easy access to apps

The built-in webOS system lets you use popular apps such as Netflix, YouTube, and Prime Video without the need for additional devices. The set includes a remote control with dedicated buttons for these services – just one click is all it takes.

Ready for gaming and entertainment

The projector is also great for gaming or watching sports. In addition, it has two HDMI ports, two USB ports, and an audio output, so you can easily connect a console, laptop, or soundbar.

Thoughtful design and accessories

The projector is compact and has a modern design. The stylish knob allows for precise adjustment, and the removable cover improves sound quality. The set includes an HDMI cable and a remote control (batteries not included). The device can also be mounted on the ceiling (1/4" thread).
