The Natec Hopper offers a reliable and precise wireless microphone solution designed for various applications including voice and communication. Featuring a lavalier microphone form factor, it ensures clear sound capture while minimizing background noise thanks to its Environmental Noise Cancellation (ENC) technology. The microphone is mounted with a clip, providing convenience and flexibility during use. Included in this set is the HOPPER lavalier microphone along with the HOPPER receiver, allowing for easy setup and sound quality. With a sensitivity of -38 dB and a frequency response range of 20 - 20,000 Hz, the Hopper is well-suited for professional audio needs, ensuring that every word and nuance is captured effectively. Its compact design and 40 mAh battery capacity make it a practical choice for everyday users and professionals alike.
