AOC Q27E4CV: Optimize Your Workflow with QHD and 120Hz Efficiency

The AOC Q27E4CV monitor is designed for professionals and advanced users who require clarity, speed, and seamless connectivity. Featuring a generous 27-inch IPS panel with stunning Quad HD (2560 x 1440) resolution, this display ensures incredibly sharp images and exceptional color accuracy across wide viewing angles (178°/178°). The IPS technology guarantees consistent, vibrant color representation ideal for graphic work and demanding applications.

Smooth Performance and Eye Comfort

Unlike standard office monitors, the Q27E4CV boasts a fast 120Hz refresh rate paired with Adaptive Sync technology, providing noticeably smoother motion when scrolling documents, editing media, or even enjoying light gaming during breaks. To protect your vision during long work sessions, this model integrates hardware-based anti-blue light technology, significantly reducing eye strain without distorting colors or affecting image quality.

Advanced Connectivity and Ergonomics

Streamline your desktop with the built-in USB-C docking station. A single USB-C cable handles high-resolution video transmission (DP alt mode), data transfer, and simultaneous device charging, offering up to 90W Power Delivery. This feature minimizes cable clutter and transforms the monitor into a powerful productivity hub. For optimal viewing comfort, the monitor includes a robust Height Adjustable Stand (HAS) and VESA mounting options, allowing you to tailor the setup to your specific ergonomic needs.

Key Specifications:

- Display Size: 27 inches (68.6 cm)
- Resolution: Quad HD (2560 x 1440)
- Panel Type: IPS for superior color accuracy and 178° viewing angles
