## DOROSIN dehumidifier ER-660E

The DOROSIN ER-660E dehumidifier was developed to effectively control humidity in large rooms of 80 to 120 m<sup>2</sup>. With an impressive dehumidification capacity of up to 60 liters per day, it provides not only comfortable living and working conditions, but also protection against mold, moisture or damage from excess moisture. Equipped with modern technology and intuitive features, the ER-660E is a must-have choice for apartments, offices, libraries or basements. Also try the Smart Life or Tuya Smart app and manage your dehumidifier from your phone!

### Ideal solution for large spaces

The DOROSIN ER-660E dehumidifier is distinguished by its ability to remove up to 60 liters of moisture per day, making it suitable for dehumidifying large spaces such as living rooms, kitchens, lofts, warehouses or garages. The unit is ideal for spaces of up to 150 sq. m, providing effective moisture removal in all conditions.

## **Advanced Panasonic compressor technology**

At the heart of the unit is a high-performance Panasonic double rotary compressor, which provides fast and efficient dehumidification with minimal noise and vibration. Thanks to the use of R410 refrigerant, the dehumidifier effectively separates water particles from the air, ensuring comfortable and dry conditions in the room.

## **Dehumidification, clothes drying and air purification**

The DOROSIN ER-660E is a versatile device that not only effectively dehumidifies the air, but also accelerates laundry drying and purifies the air thanks to anion technology. The drying function quickly removes moisture from clothes, eliminating the problem of odor during rainy weather. The air purification system enriches the space with negative ions that neutralize pollutants for a healthy and fresh atmosphere.

## **Smart operation with touch panel**

The unit features a state-of-the-art 12.6-inch touchscreen control panel that allows easy control of the dehumidifier's functions. With just one touch, you can adjust the humidity level, airflow speed or set the timer. The LED display shows the unit's operating parameters in real time, giving you full control over room conditions.

## **Capacious water tank and continuous discharge option**

The ER-660E dehumidifier is equipped with an 8-liter water tank, which means you don't have to empty it often. For even more convenience, the unit offers the option to connect a hose, allowing continuous drainage - ideal for uninterrupted operation in large spaces.

## **Quiet operation and energy efficiency**

Despite its high efficiency, the dehumidifier operates extremely quietly, making it suitable for use in areas that require peace and quiet, such as bedrooms, libraries and offices. With optimized energy consumption and power consumption of 185W (at 27°C and 60% humidity), the device is energy efficient and friendly to the household budget.

## Compact design and mobility

The DOROSIN ER-660E is a relatively compact unit (420x317x673 mm) that can easily fit into any room. With built-in wheels and handles, it is easy to carry, allowing it to be conveniently used where it is needed most.

## Safety and durability

The ER-660E dehumidifier is equipped with a number of safety features, such as overheat protection, an automatic shut-off system when the tank is full and overload protection. As a result, the device not only works effectively, but also safely, ensuring long and reliable operation.
