Prekės kodas: 380673

1,631.99€

ONEXPLAYER G1 AMD AI370 Portable Console

The ONEXPLAYER G1 is a high-performance portable console that redefines handheld gaming. Featuring an AMD Ryzen AI 9 HX 370 processor and AMD Radeon 890M graphics, this console effortlessly handles demanding AAA games. Its 8.8-inch screen with a 144Hz refresh rate delivers smooth and responsive visuals. The included magnetic keyboard transforms the console into a practical laptop, enhancing its versatility.

Next-Generation Performance

Powered by an AMD Ryzen AI 9 HX 370 processor with Zen5 architecture, 12 cores, and 24 threads, the console clocks up to 5.1 GHz, ensuring stable high frame rates even in the most graphically intense games. The integrated Radeon 890M graphics, based on RDNA 3.5 architecture, provides exceptional visual performance for smooth and immersive gameplay.

Stunning Visuals

The 8.8-inch LCD screen with a 2560x1600 resolution and 144 Hz refresh rate offers superior detail, color depth, and fluidity. With a 16:10 aspect ratio, the screen expands the field of view, providing a competitive edge in tactical and multiplayer games. A brightness of 500 cd/m² and a 1500:1 contrast ratio ensure comfortable gaming in any lighting conditions.

Advanced Cooling

The advanced cooling system, equipped with dual fans and copper heat pipes, efficiently dissipates heat, maintaining stable and quiet operation during extended gaming sessions. This cooling design ensures comfortable handling, even under heavy loads.

Full Control with OneXConsole

The OneXConsole software suite provides extensive control over your gaming experience, allowing you to adjust fan speeds, power consumption, and map buttons. This software also provides easy access to your game library.

Versatile Connectivity

Designed for flexibility, the console features a native OCuLink port, two USB-C 4.0 ports (40 Gbps), and a USB-A 3.2 port, enabling ultra-fast connections to external accessories. Expand your gaming capabilities with the optional ONEXGPU graphics card, featuring an AMD Radeon RX 7800M chip with 12 GB of VRAM. A 3.5mm audio port and a TF card slot (up to 2TB) offer additional connectivity options.

Work and Play

Transform the console into a compact workstation or entertainment center by connecting a monitor, keyboard, and mouse. Its lightweight and compact design (approximately 880g and 208 x 146.5 x 32

mm) makes it easy to carry wherever you go.

Precise and Ergonomic Controls

Hall technology sticks and triggers ensure durability and exceptional precision. Features include responsive sensitivity, smooth movement, no dead zones, built-in vibration, turbo function, ergonomic grip, RGB backlighting, and a touchpad supporting up to three touch points. Unlock the console using fingerprint or facial recognition for added security.

Premium Design and Materials

Crafted from durable 6063 grade aluminum, the console is resistant to oxidation and corrosion. The built-in speakers deliver immersive audio, while the bilinear motor, advanced pressure sensing system, and 3-axis gyroscope enhance realism and control. The 13500 mAh battery ensures long-lasting gaming sessions.

High-Speed Memory and Storage

Equipped with 64 GB of LPDDR5x memory running at 7,500 MHz, the console offers lightning-fast system response. The ultra-fast 4TB PCIe 4.0 SSD provides read speeds exceeding 7,000 MB/s and write speeds above 6100 MB/s, ensuring lag-free performance.

Included in the box:

- Portable console
- Power supply
- Power cable
- Documentation
- Keyboard
- Case

OneXplayer G1 AMD AI370 64GB RAM 4TB portable console

OneXplayer G1 is an advanced portable console that offers much more than typical handhelds. Equipped with a powerful AMD Ryzen AI 9 HX 370 processor and AMD Radeon 890M graphics chip - it can easily handle demanding AAA games (Triple-A, games with the highest budget and production quality). The 8.8-inch screen with 144Hz refresh rate ensures smooth animations and high responsiveness, and with OneXConsole software you gain full control over RGB (Red Green Blue, colored backlight) modes, performance and effects. What's more, by connecting the included magnetic keyboard, the console can act as a handy laptop.

Next-generation performance

At the heart of the console is an AMD Ryzen AI 9 HX 370 processor, based on the Zen5 architecture (AMD's fifth-generation Zen microprocessor architecture), with 12 cores and 24 threads, clocked at up to 5.1 GHz. Such power allows to run even demanding titles without FPS (Frames Per Second, the number of frames per second) drops. The G1 performs well in action games as well as racing or RPG (Role-Playing Game, role-playing game), ensuring stability and lightning-fast system response. In addition, the integrated Radeon 890M graphics chip on RDNA (Radeon DNA, AMD's GPU architecture) 3.5 offers impressive performance, allowing you to enjoy smooth gameplay without compromising on quality.

A screen that outperforms the competition

The 8.8" LCD (Liquid Crystal Display) screen used, with a resolution of 2560×1600 and a refresh rate of 144 Hz, offers excellent detail reproduction, color depth and incredible smoothness. In dynamic action games, brawling or racing, every movement becomes clear and natural, resulting in better control and faster response. In addition, the 16:10 aspect ratio increases the field of view, which is an advantage in tactical or multiplayer titles, and the brightness of 500 cd/m² and 1500:1 contrast ratio mean you can play comfortably even in bright environments. It's a screen that not only looks great, but also makes a real difference to the quality of gameplay!

Cooling built for action

www.shopro.lt | info@shopro.lt | +370 693 39903

An advanced cooling system with dual fans and copper heat pipes effectively dissipates heat even under intense load. As a result, the console runs stably and quietly - even during long sessions with demanding games. Lower temperatures also mean greater comfort - you can hold the device comfortably in your hands.

Full control with OneXConsole

OneXConsole software gives gamers tools that give you more control over gameplay and the console. Change settings such as fan speed or power consumption, set Turbo and map buttons - all in one place. You also gain convenient access to your game library.

Ready for expansions

The console is designed with flexibility and expansion in mind. Equipped with a native OCuLink (Optical Copper Link, a high-speed interface for communication with eGPUs) (PCIe - Peripheral Component Interconnect Express, an interface for high-speed communication with computer components, 63 Gbps) and two full-fledged USB-C (Universal Serial Bus Type-C, a universal connector for data and power) 4.0 (40 Gbps) ports - it provides ultra-fast communication with external accessories. For example, you can connect to it an additional ONEXGPU graphics card (sold separately), equipped with an AMD Radeon RX 7800M chip with 12 GB of VRAM (Video RAM, video memory), which allows you to significantly increase performance in AAA games. The G1 also enables lightning-fast data transfer and fast charging. The G1 is also equipped with a USB-A 3.2 port, a 3.5mm audio port and a slot for a (TransFlash, microSD memory card) TF card of up to 2TB.

For work and entertainment

With a monitor, keyboard and mouse connected, you can turn the console into a compact work or entertainment center. Play on larger screens, use voice messaging or even create graphic designs - all on one device. The G1 doesn't limit you to playing on the couch - it works wherever you need it! At the same time, the console is very light (only about 880 g) and compact (208 x 146.5 x 32 mm), so you can easily carry it in your purse or backpack.

Precise control without compromise

The sticks and triggers with Hall technology ensure not only durability, but also exceptional precision. Responsive sensitivity, smooth movement and no dead zones are the key to winning in FPS (First-Person Shooter), racing or brawling games. Built-in vibration and turbo function increase immersion and allow faster reactions in dynamic scenes, and the ergonomic grip ensures that hands don't get tired even after several hours of gaming. There's also stylish RGB backlighting and a touchpad that supports up to three touch points simultaneously. You can also unlock the console using both your fingerprint and facial recognition.

Attention to detail

The console uses durable 6063 grade aluminum, which is resistant to oxidation and corrosion. What's more, the built-in speakers are intelligently controlled to provide an unforgettable gaming experience. Enjoy a dreamlike level of immersion! The bilinear motor, advanced pressure sensing system and 3-axis gyroscope are also responsible for the realistic experience, enabling precise control and full immersion in the game world. On top of that, there is a 13500 mAh battery.

Reliable memory

The memory used is LPDDR5x (Low Power Double Data Rate 5X, an energy-efficient high-bandwidth operating memory) with a frequency of as much as 7,500 MHz and a capacity of 64 GB, ensuring lightning-fast system response and smooth operation even when playing the most demanding titles. Such bandwidth also supports integrated graphics, which translates into better performance. Then there's the ultra-fast 4TB PCIe 4.0 SSD (Solid State Drive) - with read speeds exceeding 7,000 MB/s and write speeds above 6100 MB/s. It's a configuration built for next-generation gaming and lag-free operation!
