OneXplayer X1 Air Portable Gaming Console

The OneXplayer X1 Air is a versatile 3-in-1 device, functioning as a laptop, gaming console, and tablet. Equipped with an Intel Ultra 7 258V processor and a 10.95-inch touchscreen, it delivers smooth gameplay and stable performance for demanding applications. Its comprehensive cooling system and rich set of ports ensure comfortable, extended use. Featuring 32GB of RAM and a 1TB SSD, the X1 Air supports split controllers and incorporates OneXConsole software, certified Harman audio, and a full suite of Windows 11 features, making it ideal for gamers and professionals needing a mobile workstation. Whether you're playing AAA games, streaming your favorite shows, or tackling emails, the X1 Air adapts to your needs seamlessly.

OneXplayer X1 Air portable console Intel ultra 7 258V 32GB RAM 1TB

The oneXPlayer X1 Air is a 3-in-1 device that can function as a laptop, game console or tablet. It's equipped with an Intel Ultra 7 258V processor, a 10.95-inch touchscreen, an extensive cooling system and a rich set of ports to ensure smooth gameplay, stable operation with demanding applications and comfortable use. In addition, it offers 32GB RAM and a 1TB SSD. Split controller support, OneXConsole software, certified Harman audio and a full range of Windows 11 features make the X1 Air a versatile tool for both gamers and users who need a mobile workstation. It's a portable console, tablet and laptop all in one - play a AAA game, watch another episode of your favorite TV series, then plug in the keyboard and get busy answering emails. You don't have to limit yourself!

Large 10.95" screen for games, movies and work

The large 10.95" display offers a wide field of view and 10-point multitouch. The LTPS panel used ensures high quality, and the combination of 2560×1600 resolution, 540 nits brightness and 120 Hz

refresh rate translates into smooth and clear images. Support for 138% sRGB guarantees intense colors, and the 25 ms response time allows you to play dynamic games with ease. In addition, the 16:10 aspect ratio increases the working space, and DC technology eliminates flicker for improved comfort during prolonged use.

Intel Ultra 7 258V processor - the full power of a mobile PC

The OneXPlayer X1 Air uses the second-generation Intel Core Ultra 7 258V processor, designed specifically for gaming and multitasking. The chip is equipped with four performance cores and four low-voltage cores, so it can simultaneously deliver high computing power and operate energy-efficiently when needed. This is complemented by a maximum clock speed of 4.8 GHz and 12 MB of cache memory. The X1 Air also improves local processing based on artificial intelligence - from offloading games and streaming to generating images and sound. The device's processor is equipped with three integrated AI gas pedals to ensure fast performance while ensuring data security and privacy. The system's total computing power is 115 TOPS, with 64 TOPS coming from the graphics chip and 47 TOPS from the NPU.

Intel Arc 140V integrated graphics with XeSS 2.0 support

The X1 Air uses Intel Arc 140V integrated graphics based on the Xe2 architecture, with 8 ray tracing units and 8 Xe2 cores. The chip offers a maximum dynamic frequency of 1.95 GHz and a processing power of 64 TOPS, which allows for high fluidity and detailed images in modern games. The hardware also supports Intel Xe SuperSampling 2.0 (XeSS 2.0) technology, which improves image quality and performance through the use of AI algorithms, supporting XeSS-SR, XeSS Frame Generation and Xe Low Latency (XeLL) modes. The solution improves animation smoothness and reduces response time. In addition, there are Intel Application Optimization updates that improve game performance for a more responsive and stable experience.

32GB RAM and 1TB SSD

OneXPlayer X1 Air uses dual-channel LPDDR5x memory at up to 8533 MHz. The 32 GB of RAM allows advanced games, large graphics projects, 3D animations and multiple applications running simultaneously to run smoothly - without slowdowns or limitations. Then there's a 1TB SSD for fast data access. In addition, there is an optional PCIe Mini SSD expansion (plug and play), which allows

you to expand the memory (up to a maximum of 2 TB) without dismantling the device - just slide in the additional module and start using more space immediately. Don't worry about running out of space for your games or graphic design projects!

Something for gamers - convenient control with a controller

You can connect a dedicated split controller to the device. The construction of the grips was designed with the natural curvature of the hand in mind, so even long sessions do not cause discomfort. Joysticks use Hall Effect technology, eliminating drift and dead zones, and with a height of 7.5 mm and a swing angle of up to 22°, they provide incredible precision. What's more, their RGB backlighting is customizable. There are two programmable buttons on the back of the controllers, and the built-in triggers provide more control with 8.1mm linear travel and 0.2-1mm micromotion. All this translates into comfortable and precise control in racing games, FPS or titles that require smooth pressure adjustment.

Harman AudioEFX system - fantastic sound quality

The X1 Air features the Harman 2.0 stereo audio system and dedicated speaker components created to Harman Gold Ear team standards. As a result, you get sound with great clarity, high detail and deep bass - perfect for playing games, watching movies or listening to music. Hear every step of your opponent or immerse yourself in the world of your favorite TV series!

OneXConsole - full control over your device

OneXConsole software allows you to adjust CPU, GPU, fan speed, screen resolution, brightness and vibration settings, among other things. You can also, for example, use available presets, gyro simulation and button mapping. The program also allows you to archive game data in the cloud, making it easy to transfer your progress between different devices.

Convenient operation - several available ports and buttons

The X1 Air has two USB-C 4.0 ports (up to 40 Gbps), a USB-A 3.2 port, a TF 4.0 card slot and a connector for a PCIe 4.0 Mini SSD, plus a 3.5mm audio connector, a Turbo button and an easily accessible power button. This makes the device convenient to use and allows you to seamlessly

connect headphones or other devices such as GPU docking stations, 4K monitors, hard drives, VR equipment and more.

Windows 11 and broad compatibility with gaming platforms

With Windows 11 installed by default, you can work comfortably and use platforms such as Steam and Epic Games, for example, seamlessly. This gives you full access to your gaming library! The front camera allows you to record footage and broadcast live, plus it works with Windows Hello. What's more, the device can be unlocked using both facial recognition and fingerprint.

Refined design - long service life and durability

The device was created from solid aluminum, precisely milled using CNC technology. As a result, it is lightweight yet durable. In addition, it was equipped with a practical stand that allows you to smoothly position it at different angles - up to 173°. Inside was a 72.77 Wh battery, which provides up to 12.5 hours of office work and up to 17 hours of playback of locally stored videos. A dual-fan cooling system takes care of maintaining a stable temperature, while Wi-Fi 7 technology ensures fast transmission and low latency. In addition, with a magnetic keyboard attached, the device will work great as a laptop. Key stroke of 1.5 mm, activation force of 60 g, backlighting and a precise touchpad with gesture support allow comfortable operation in various scenarios.

Manufacturer	OneXPlayer
Model	X1 Air
Processor	Intel Core Ultra 7 258V, 8C/8T, up to 4.80 GHz, 12 MB cache
Graphics	Intel Arc Graphics 140V, 1.95 GHz, 64 TOPS AI Compute
NPU	Intel AI Boost, 47 TOPS of AI performance
RAM	LPDDR5x 8533 MHz 32 GB
Embedded memory	M.2 2230 SSD, PCIe 4.0 x4 1 TB

Display	10.95" LTPS, 2560×1600 (16:10), 120 Hz, 10-point touch, DCI-P3 100%, sRGB 138%
Camera	1 MP front camera
Fingerprint reader	Yes
Battery capacity	72.77 Wh
Cooling system	Aluminum heatpipes: 21,000 mm ² cooling surface, dual V6 tubes Dual fans 8500 rpm, 3.47 CFM, 47 dBA
Ports	2× USB-C 4.0 (full functionality), 1× USB-A 3.2, 1× 3.5mm audio jack, 1× TF 4.0 card slot (up to 2 TB, 500 MB/s), 1× Mini SSD PCIe 4.0 slot, bus for detachable controllers
WiFi	WiFi 7
Bluetooth	Bluetooth 5.2
Audio	Dual 8 ohm / 1 watt speakers, Harman Audio certification
Software	OneXConsole
Operating system	Windows 11
Dimensions	252 × 163.5 × 13.5 mm
Weight	Approximately 892 g (with controllers)
Additional features	Adjustable stand 0°-175°, Pogo Pin magnetic keyboard support, detachable gamepad with Hall Effect triggers
Triggers	Hall sensors
Top buttons	Microswitch, 8.1 mm stroke, 150 g force
Joystick	Adjustable stroke 0.2-1.0 mm, 90 g force
D-Pad	8-way microswitch with removable option
Vibration	Standard haptic motor
Gyroscope	3-axis gyroscope + 3-axis accelerometer
