Puluz 50cm LED shadowless tent PU5051EU

The Puluz PU5051EU is a shadowless tent that allows you to create professional product photography without complex lighting setups. The 50cm working space, powerful LED panel and included colorful backgrounds provide a comfortable and practical workstation that you can set up in moments - at home, in the office or in the field.

Light that adapts to your product

The LED panel includes 200 2835 LEDs with a brightness of 25 lm each. A high CRI value of ≥ 90 ensures faithful color reproduction, and a silver reflective coating evenly reflects light, eliminating darker zones and vignetting. As a result, you get consistent, clean and detailed photos! You can also choose from three lighting modes (white, soft and warm), making it easy to match the atmosphere of the shot to the subject being photographed. In addition, ten levels of brightness adjustment (from 1% to 100%) allow you to fine-tune the light without the need for additional lamps.

Soft light without unwanted reflections

The kit includes a diffusion cloth that softens the light and reduces reflections. This is especially useful when photographing shiny products such as glass, decorations or jewelry. It's a simple way to create a more elegant and organized frame.

Various shooting angles

The tent allows you to shoot from both the front and the top. So you can easily get classic packshots, catalog photos and much more.

Colorful backgrounds included

A set of six double-sided PVC backdrops gives you as many as twelve colors to choose from - including black, white, gray, gold, yellow, orange, red, pink, blue, purple, green and brown. This allows you to quickly change the nature of the scene and perfectly match the background to your product, season or brand style.

Collapsible and ready to go anywhere

The PU5051EU shadowless tent folds down to a compact size, making it easy to transport and store. The included bag lets you conveniently take it into the field, and the whole thing folds up without tools. You also don't have to worry about power supply. You'll connect the tent to a standard power supply, powerbank or computer.

Included

- LED shadowless tent
- Carrying bag
- Black / white PVC background
- Gray / gold PVC background
- Yellow / orange PVC background
- Red / pink PVC background
- Blue / purple PVC background
