OBSBOT VOX SE Microphone for Tiny 3/3 Lite

OBSBOT Vox SE is a compact, wireless lapel microphone designed for OBSBOT Tiny 3/3 Lite camera users who expect high-quality sound, complete freedom of movement, and reliability in their daily work. It works well for streaming, video recording, interviews, and online training, as well as in business applications where speech clarity and comfort are key. With its wireless design, Vox SE lets you focus on your content, not your equipment.

Clear, natural sound in any situation

The microphone records sound with omnidirectional characteristics, allowing for natural voice capture without the need for precise positioning. High recording quality is ensured by 48 kHz / 24-bit sampling, a wide frequency response of 50 Hz–20 kHz, and low noise levels. With a maximum SPL of 123 dB, the Vox SE can handle both quiet speech and louder statements without distortion, maintaining clarity and detail.

Stable transmission and low latency

Wireless communication based on GFSK technology with a bandwidth of 2 Mbps guarantees a stable connection and very low latency of around 22 ms. This keeps the sound perfectly synchronized with the image, which is crucial for video recordings and live broadcasts. One-time pairing means that after the initial setup, the microphone automatically connects to a compatible device—no need to reconfigure after each startup.

Long battery life and full mobility

OBSBOT Vox SE is designed for long recording sessions. The built-in 170 mAh battery provides up to 20 hours of continuous operation on a single charge, eliminating the need for frequent recharging. With a range of up to 100 meters in open terrain, you can move freely around the recording space, which will be appreciated by trainers, speakers, and creators who work on the go.

Lightweight design and flexible wearing options

Its compact size and weight of approximately 9 g make the microphone virtually imperceptible when worn. The Vox SE offers several mounting options, including a clip and magnetic accessories, allowing it to be easily adapted to different clothing styles and recording scenarios. Its discreet form and solid construction make it well suited for both professional video productions and everyday use.

Included:

- OBSBOT Vox SE wireless transmitter
- Transmitter charging dock
- Windshield
- Magnetic microphone clip
- Magnetic rear clip
- Magnetic neck lanyard
- USB-C power cable
- Carrying case

Manufacturer	OBSBOT
Model	VOX SE
Compatibility	OBSBOT Tiny 3/3 Lite webcams
Dimensions	28.53 × 25.47 × 11.5 mm (length × width × height)
Weight	Approximately 9 g (without magnetic clip)
Operating time	Up to 20 hours
Microphone directionality	Omnidirectional
Sensitivity	-37 dBFS ±1 dBFS @ 1 kHz, 94 dB SPL
Maximum sound pressure level (SPL)	123 dB SPL
Signal-to-noise ratio (SNR)	68 dBA
Frequency response	50 Hz – 20 kHz
Sampling frequency and bit depth	48 kHz / 24-bit
Wireless transmission mode	GFSK 2 Mbps
Battery voltage	3.7 V (actual operating voltage: 3.3–4.4 V)
Operating range	Up to 100 m (measured in an open, interference-free and obstacle-free environment – approximate value)
Battery capacity	170 mAh
Operating temperature range	0°C to 40°C
Latency	22 ms
