Unlock unparalleled gaming prowess and visual excellence with the GIGABYTE GeForce RTX 5050 D6 8G graphics card. Engineered to redefine gaming standards, this NVIDIA GPU utilizes cutting-edge technologies like DLSS 4 and the high-speed PCI Express 5.0 interface to deliver stunning visuals, high frame rates, and seamless gameplay experiences. Whether you are building a new system or upgrading, the RTX 5050 provides the necessary power and precision to dominate any virtual battlefield.

Core Performance and Speed

The GeForce RTX 5050 is designed for modern gaming demands. Featuring 8 GB of high-speed GDDR6 memory on a 128-bit bus and a boost clock frequency up to 2572 MHz, this graphics card handles demanding applications and games with ease. The integration of NVIDIA DLSS 4 ensures superior upscaling and image quality, dramatically boosting performance while maintaining graphical fidelity.

Key Technical Specifications:

- **Graphics Processor:** NVIDIA GeForce RTX 5050, optimized for efficiency and performance.
- **Dedicated Memory:** 8 GB GDDR6 VRAM with a fast 20000 MHz memory clock speed.
- **Interface Standard:** Ultra-fast PCI Express 5.0 for maximum bandwidth utilization.
- **Core Clock Speed:** High frequency performance up to 2572 MHz.
- **Cooling System:** Efficient Active cooling design featuring a single fan, ensuring optimal thermal management.
- **Resolution Support:** Supports maximum digital resolution of 7680 x 4320 pixels (8K ready).
- **Connectivity:** Versatile I/O setup including 2 x DisplayPort and 2 x HDMI ports for multi-monitor setups.
- **API Support:** Full compatibility with DirectX 12.0 and OpenGL 4.6.

Advanced Connectivity and Cooling

Connectivity is versatile, offering four digital outputs (2x DP, 2x HDMI), allowing flexible multi-display configurations for work or immersive gaming. Despite its robust performance, the GIGABYTE RTX 5050 D6 maintains thermal efficiency through its active cooling solution featuring one dedicated fan, ensuring stable operation even under load.
