Peladn WI-6 N100 Mini PC 16GB+512GB

The Peladn WI-6 N100 Mini PC is a compact desktop computer that combines an advanced Intel Alder Lake processor with low power consumption and high performance. It offers fast startup thanks to an NVMe SSD and comfortable multitasking supported by a large amount of RAM. 4K image support, video decoding, a wide range of ports, and wireless connectivity make it a versatile tool for office work and multimedia. The small VESA-mountable case and quiet cooling make the computer ideal for use wherever space savings and ease of use are important.

Compact form, surprising power

The device weighs only 0.27 kg and measures only 124 × 112 × 35 mm, so it can easily fit on a desk, under a monitor, or be mounted behind the screen using the included VESA mount. Its minimalist size goes hand in hand with real performance that will prove itself both in office work and everyday multimedia use.

Intel Alder Lake-N processor

At the heart of the computer is an energy-efficient Intel N100 processor from the Alder Lake family, equipped with four cores and four threads. This unit achieves a clock speed of up to 3.4 GHz in Turbo mode, which translates into smooth system and application operation and multitasking without annoying delays. Low power consumption of only 6 W TDP keeps the computer cool and economical, maintaining stability even during prolonged use.

Smooth operation and comfortable multitasking

The Peladn WI-6 is equipped with fast 16 GB DDR4 memory with a clock speed of 3200 MHz, which ensures efficient operation of multiple programs simultaneously. It can easily handle Microsoft Office applications, browsers with multiple tabs, and tools for everyday office work. The high responsiveness of the system is further supported by a 512 GB M.2 NVMe SSD, offering fast system startup and instant access to data.

Ready for 4K multimedia

This miniature computer will surprise you with its high-quality multimedia playback. It supports 4K content display at 60 frames per second, even on multiple screens simultaneously. Hardware AV1 decoding and support for 10-bit HEVC and VP9 guarantee smooth video playback, even in high quality. It is the perfect solution for working with large monitors, presentations, and as a home multimedia center.

Stable construction and quiet operation

The HardCore 1.0 design, combined with an efficient yet quiet cooling system, ensures stable computer operation even under prolonged load. Low power consumption and well-designed cooling mean that the device does not distract with noise and is ideal for the office, study, or home office.

Full set of connectors in a small case

Despite its compact dimensions, the Peladn WI-6 offers a rich set of ports. The front panel features an audio connector for headphones and microphone, a USB-C port, two USB 3.0 ports, and a power
