Peladn WI-6 N150 Mini PC 16+512GB

The Peladn WI-6 N150 Mini PC is a compact yet extremely powerful desktop computer that combines a Twin Lake processor, integrated UHD graphics, 16 GB of fast RAM, and a spacious SSD in a small, space-saving case. It offers support for three 4K monitors, a rich set of connectors with a full-featured USB-C port, stable wireless and wired connectivity, and quiet, efficient operation. With VESA mounting capability and universal design, it is suitable for office, home, creative, and multimedia applications.

Compact power that surprises

The Peladn WI-6 N150 Mini PC is designed for users who expect high performance without taking up valuable desk space. Measuring just 124 x 112 x 35 mm, the device fits easily into any workspace while remaining easy to carry – ideal for the office, home, and mobile work.

Powerful Twin Lake N150 processor

At the heart of the Peladn WI-6 is an advanced Twin Lake N150 processor manufactured using a 7-nanometer process technology. Four cores and four threads, along with a maximum turbo frequency of up to 3.6 GHz, ensure smooth system and application performance even for more demanding tasks. Integrated UHD graphics clocked at 1000 MHz enable comfortable work with multimedia, graphic designs, as well as light gaming and high-resolution video editing.

Smooth and fast operation

The use of 16 GB of DDR4 memory with a frequency of 3200 MHz guarantees responsiveness and stability even when working with multiple applications simultaneously. The 512 GB M.2 SATA SSD in 2280 format ensures fast system startup, short program loading times, and comfortable management of large files, which you will appreciate both at work and during leisure time.

4K image on three screens simultaneously

The Peladn WI-6 Mini PC is designed for multitasking and a well-thought-out workstation. Support for three 4K screens at 60 Hz significantly increases productivity and ease of use. Two HDMI 2.0 ports and a fully functional USB-C port allow for flexible monitor connection, ensuring sharp images, smooth animations, and a large workspace.

A rich set of connectors

The full-featured USB-C port is one of the biggest advantages of this model. It supports fast data transfer up to 10 Gb/s, Power Delivery, and DisplayPort 1.4 image output, making it an extremely versatile solution. This is complemented by two USB 3.2 ports and two USB 2.0 ports, allowing you to connect up to four peripheral devices simultaneously. The front panel also features a 3.5 mm audio jack and a convenient power button, while the rear panel has a complete set of connectors including HDMI, USB, RJ45 LAN, and a power jack.

Stable connectivity and quiet operation

Dual-band Wi-Fi combined with Bluetooth 4.2 and a wired RJ45 LAN port ensures a stable and fast network connection, regardless of conditions. A well-thought-out cooling design, including a quiet fan and well-placed ventilation holes, ensures optimal operating temperature without annoying noise, even under heavy load.

Versatile use for every situation

The Peladn WI-6 N150 is suitable for a wide range of applications, from office and remote work, through rendering, graphic design, and video editing, to entertainment and casual gaming. Thanks to the included VESA mount, the Peladn WI-6 can be mounted directly behind the monitor, completely eliminating cable clutter and freeing up desk space. Its minimalist design and compact form make it a perfect fit for modern workstations.

Included in the set

- mini PC
- power supply
- power cable
- HD cable
- VESA mount with screws
- user manual

Manufacturer	Peladn
