- **Optional 4G/LTE Module:** Provides more predictable bandwidth and faster download speeds, offering a reliable backup connection for 24/7 operation or where local network connections are unavailable.
- **ADS Wide-View Panel:** Delivers faster on-display picture processing for smoother content transitions, remarkable image accuracy, and superior color reproduction with 180-degree viewing.
- **FailOver:** Automatically plays backup content on screen in the event of a media player failure, ensuring your display never goes blank.
- **Modular Design:** Extend the display's lifetime with easily detached and replaced components, focusing on sustainability and reduced disposal.
- **Android SoC Processor:** Powered by Android 11, optimized for native Android apps, and allows you to install web apps and software directly onto the display, eliminating the need for an external media player.
- **Cloud Connectivity:** Connect and control content via the cloud with the integrated HTML5, Chromium-based browser. Design content online and connect a single display or an entire network.
- **Wave Cloud Platform:** Remotely control your Philips D-Line displays with Wave, simplifying installation, monitoring, controlling displays, upgrading firmware, managing playlists, and setting power schedules.

Philips is a global leader in technology, committed to innovation and improving people's lives through meaningful solutions. Known for their quality and reliability, Philips products are designed to meet the demands of both business and personal use.

content immediately. Working in conjunction with the internal browser, it also serves as a memory cache when streaming online content. If the network ever fails, the internal memory keeps content running by playing a cached version of the content, ensuring that your media stays up even if the network goes down.

4G/LTE optional module for reliable connection

Select our optional 4G/LTE module for more predictable bandwidth and faster download speeds, providing you with a reliable backup connection in case of 24/7 work requirements or where local network connections are not possible.

ADS wide-view panel display

Be seen from any angle with ADS wide-view technology. Advanced Super Dimension Switch delivers faster on-display picture processing for smoother content transitions, remarkable image accuracy, and superior colour reproduction with 180 degree viewing.

FailOver. Ensure your display never goes blank

Critical for demanding commercial applications, FailOver is a revolutionary technology that automatically plays back-up content on screen in the unlikely event of a media player failure. Simply select a primary input connection and a FailOver connection and you are ready for instant content protection.

Modularity - longer product lifetime

Extend your display into the future with our modular approach. Bringing opportunities for longer product lifetime with easily detached and replaced components, and a firm focus on sustainability, with reduced WEEE disposal.

Android SoC processor. Native and web apps

Powered by Android 11, your Philips D-Line delivers the ultimate, most secure and connected display experience. Optimised for native Android apps, and enabling you to install web apps and software directly onto the display, eliminating the need for an external media player.

Connect and control your content via the cloud

Connect and control your content via the cloud with our integrated HTML5, Chromium-based browser. Design your content online and connect a single display, or your entire network, either
