Optimized for Dedicated Graphics

The 'F' designation indicates that this processor lacks an integrated graphics core (iGPU). This makes the Core i3-13100F an ideal choice for systems where a dedicated graphics card is mandatory, allowing you to allocate your budget more efficiently towards a stronger GPU for better gaming performance.

Key Features of the Intel Core i3-13100F:

- **Architecture:** Raptor Lake (13th Generation) provides enhanced efficiency and speed compared to previous generations.
- **High Clock Speeds:** Base speed of 3.4 GHz, boosting up to 4.50 GHz for quick load times and smooth operation.
- **Socket Compatibility:** Utilizes the modern Intel LGA 1700 socket.
- **Dedicated System Focus:** Absence of integrated graphics core makes it perfectly suited for systems relying on dedicated graphics processing units.

INTEL is the global leader in processor technology, driving innovation in computing for decades. Known for their reliable performance, cutting-edge architectures, and comprehensive ecosystem support, Intel processors are the foundation of millions of computers worldwide.
