With a massive configuration of 24 processing cores and a stunning maximum clock frequency of 5.6 GHz, the Core Ultra 9 285 is engineered to handle extreme multitasking, complex rendering tasks, and frame-rate-intensive gaming without compromise. This new architecture ensures improved performance scaling and power efficiency compared to previous generations, making it ideal for modern high-end PCs.

Core Features and Specifications:

- **Elite Performance:** Features 24 total processing cores, providing massive parallel computing power for demanding applications.
- **High Clock Speeds:** Achieves maximum turbo frequency of 5.6 GHz for instantaneous responsiveness in single-threaded tasks and gaming.
- **New Architecture:** Utilizes the cutting-edge Intel Arrow Lake design, requiring the latest platform compatibility.
- **Platform Compatibility:** Requires the new high-density Socket 1851 motherboard platform.
- **Packaging:** Supplied in a boxed format (BX80768285), ready for system integration.
- **Cooling Requirement:** This processor does not include a cooling solution (W/O Cooler) and requires a high-performance aftermarket cooler to maintain optimal thermal management.

INTEL is globally recognized as the leader in semiconductor innovation, consistently pushing the boundaries of computing technology to deliver the fastest and most reliable processors available today.
