Aprašymas

This optional 320GB Hard Disk Drive can added to selected SureColor printers. It mounts internally and can be user installed with minimum effort. Once installed it operates as a high speed print server and allows files to be spooled to the printer by multiple users. It provides support for larger file sizes while also enabling faster and more efficient operation with reduced network traffic. Jobs which have been spooled to the HDD and are awaiting printing can be rescheduled remotely and from the printer control panel. Once jobs have been printed they can also be recalled and reprinted without having to be retransmitted.

Techninė specifikacija

Savybės

Kietojo disko talpa	320 GB
Tipas	HDD
Taikoma	Spausdintuvas / MFU
