- **Easy to Clean and Reliable Design:** Features NeoV Optical Glass with anti-acid and anti-alkali coating, resistant to alcohol and cleaning solutions.
- **Durable Construction:** Metal casing and proprietary glass technology protect against scratches and damage.
- **Versatile Connectivity:** Includes HDMI and DisplayPort 1.2 for integration with various instruments.
- **Multitasking Capabilities:** PIP/PBP functionality enables simultaneous viewing of different images or medical records.
- **Medical-Grade Safety:** Low-voltage medical-grade power supply ensures safety and reliability.
- **Compliance:** Meets EN/IEC 60601-1 standards for safe performance in medical settings.

AG Neovo is a company known for providing high-quality display solutions tailored for various professional applications, including medical environments, ensuring reliability and performance.

Order today from ++SHOP++ as we offer the best prices and fast shipping.

Consistent Image Clarity

The MX-Series is compliant with the DICOM Part 14 standard specifications. This calibration function corrects gamma and luminance to achieve the smooth grayscale that is required for the accurate and consistent appearance of clinical data and other review images.

Easy to Clean and Reliable Design

The anti-acid and anti-alkali coating treatment of the NeoV Optical Glass help the MX-Series withstand alcohol and other commonly used cleaning solutions. With the displays also bolstered by metal casing, this proprietary glass technology shields them from scratches and other damage.

Versatility and Multitasking

Multiple signal source options, including HDMI and DisplayPort 1.2, offer the versatility for the MX-Series to integrate with other instruments. Its broad connectivity enables the PIP/PBP capability that makes multitasking possible—studying different images or matching medical records—in a single display.
