Extreme Performance for Competitive Gaming

Gain the definitive advantage with an ultra-fast 260Hz refresh rate. This high refresh speed virtually eliminates motion blur and ensures that every frame is rendered smoothly and clearly, allowing you to react instantaneously to in-game action. Coupled with a minimal response time, this display is built for speed:

- **Ultra-Fast Response Time:** Achieve speeds up to 0.3 ms (MPRT) and true 1ms (GTG) with the specialized Fast IPS panel, eliminating ghosting and smearing during rapid movements.
- **QHD Clarity:** The 2560 x 1440 resolution provides four times the detail of standard HD, making details crisp and vivid for editing, viewing, and gaming.
- **Adaptive-Sync Technology:** Enjoy fluid, artifact-free performance by synchronizing the monitor's refresh rate with your GPU's framerate, eliminating screen tearing and stuttering.
- **HDR10 Support:** The monitor supports HDR10, enhancing contrast, brightness (300 cd/m²), and color depth for a more engaging and visually inspiring experience.

Optimized Visuals and Eye Comfort Features

The AOC Q27G42ZE doesn't just prioritize speed—it also delivers exceptional color quality and viewing comfort. The Fast IPS panel supports a wide color gamut, including 95.2% DCI-P3 and 123.6% sRGB coverage, ensuring vibrant and true-to-life colors in SDR and HDR content. The screen features an anti-glare coating and wide 178-degree viewing angles.

- **AOC Low Input Lag:** Switch into a dedicated mode that favors raw response time over graphical processing, connecting your hands with your on-screen actions faster than ever.
- **AOC Game Color:** Optimize your game settings by adjusting color saturation and grey levels to enhance visibility in different scenarios (including FPS, Racing, and RTS modes).
- **Flicker-Free Technology:** Utilizing a DC (Direct Current) backlight system, the monitor significantly reduces screen flicker, minimizing eye fatigue during extended gaming sessions.
- **Connectivity:** Conveniently connect your PC or console via the included HDMI and DisplayPort inputs.

AOC INTERNATIONAL is a global leader in display technology, known for producing high-quality monitors ranging from professional office displays to cutting-edge gaming equipment tailored for competitive esports performance.

Order today from ++SHOP++ as we offer the best prices and guaranteed quality for your next gaming upgrade.

Only for the true valiant! Q27G42ZE is a 27 inch gaming monitor made with Fast IPS panel, equipped with Adaptive Sync technology, guaranteeing you 0.3ms MPRT response times and 260Hz refresh rate. The HDR10 feature and Game Color technology captivate visual quality, raise your gaming performance to the next level!

Superior high quality viewing

Quad HD (2560 x 1440) resolution allows you to view more an incredible amount of detail, resulting in visuals that are crisp and vivid. Whether editing photos, videos, or watching movies, Quad HD gives you clarity and quality.

Enjoy top-tier gaming performance

With a 260Hz refresh rate , your display will be equipped to perform at the pro gaming standard. Enjoy an ultra-smooth experience with no visible screen blur to ensure you're always prepped to win.

Instant response times

A pixel response time of 0.3ms MPRT means speed without the smear for an enhanced gaming experience. Fast-moving action and dramatic transitions will be rendered smoothly without the annoying effects of ghosting. Choose the right path to gaming success, and never let a slow display stop you.

Rule the Competition with Fast IPS

Fast IPS annihilates the competition with a speed 4x faster than conventional IPS. Guaranteeing you true 1ms (GTG) response times and captivating visual quality, raise your gaming performance to the next level!

A universally respected anti-tearing solution

Gaming shouldn't be a choice between choppy gameplay or broken frames. Get fluid, artifact-free performance at virtually any framerate with Adaptive-Sync technology, smooth quick refresh and ultra-fast response time.

Illuminate your visuals

Enjoy an immersive visual experience with HDR 10, the industry-standard high dynamic range for delivering a rich palette of colors, brightness, and contrast that far exceeds the capabilities of ordinary monitors, engaging your senses and creatively inspiring you.

Connecting your eyes with your hands

Unleash your reflexes by switching to AOC Low Input Lag mode. Forget graphical frills: this mode rewires the monitor in favor of raw response time, giving you the ultimate edge in a hair-trigger standoff.

Optimize your game settings

Enhances color and sharpness for different game styles. Six modes to select: FPS, Racing, RTS, Gamer1, Gamer2, Gamer3 and Off.

Experience more immersive and vivid gameplay

With AOC Game Color, you can adjust color saturation and grey levels across multiple levels of detail for a better game experience. Delight in more vivid MMORPG scenes, more intense FPS action, and better MOBA character details.

Protect your eyes from screen flicker

Flicker-free technology reduces flicker to give you a more comfortable gaming experience. Normal LED-backlit monitors adjust brightness using PWM (Pulse Width Modulation) which causes flickering and results in eye discomfort over long periods of time. AOC flicker-free technology uses a DC (Direct Current) backlight system to provide a more comfortable and healthier viewing experience, minimizing the effects of eye fatigue during work hours.

Connectable with other devices

This AOC monitor provides convenient connectivity options, with both HDMI and DisplayPort support to suit both professionals and home users. HDMI represents the leading digital video, audio, and data interface for high speed connections between ultra high-definition displays and a wide range of consumer electronics, including providing support for modern gaming consoles and PCs. DisplayPort allows for a range of devices to quickly and easily connect to your screen, delivering higher resolution, faster refresh rate and video transmissions free from input lag.

The AOC Gaming Q27G42ZE is designed for gamers who demand high performance and stunning visuals. Featuring a 27-inch display with a native resolution of 2560 x 1440, this monitor delivers sharp imagery at a V-Sync rate of 240 Hz, ensuring every fast-paced action is rendered smoothly and clearly. The Fast IPS technology, combined with a 0.3 ms response time, offers an exceptional gaming experience with minimal blur and ghosting, allowing gamers to react swiftly during critical moments. With an anti-glare coating and a brightness level of 300 cd/m², this monitor provides excellent visibility in various lighting conditions. The wide viewing angles of 178 degrees both horizontally and vertically mean gamers can maintain image clarity from multiple positions. Furthermore, the inclusion of Flicker-Free and Adaptive-Sync technologies reduces eye strain and enhances gameplay fluidity. Whether playing in SDR or HDR, this monitor supports a wide color gamut, including 95.2% DCI-P3, for vibrant and true-to-life colors.
