AG Neovo QX-28 4K Surveillance Monitor

The AG Neovo QX-28 is a 28-inch 4K surveillance monitor meticulously designed for demanding video security systems. Its multi-screen viewing capability allows for the simultaneous display of multiple video footage signals, supporting up to 4 split screens. This feature simplifies hardware setup by consolidating what would require four 1080p monitors into a single, high-clarity display. The QX-28 significantly enhances real-time and up-close monitoring in critical environments such as control rooms, traffic management centers, casinos, and emergency operation centers.

EASY CONTROL AND INTEGRATION

Its built-in RS232 and Ethernet control capabilities make this surveillance monitor easy to control and integration a breeze. Whether it is a local serial management connection or a remote network installation, it can be managed in multiple control room scenarios.

MULTI-SCREEN VIEWER; ONE DISPLAY, FOUR SCREENS

Beyond the traditional two-input Picture-by-Picture (PIP) feature, the multi-screen viewer functionality can display up to four Full HD screens simultaneously from four different input sources. This advanced feature allows it to replace a typical four monitor setup and delivers four-quadrant viewing at crisp and true 1080p content.

INDUSTRY-LEADING RELIABILITY

Designed for 24/7 operation, this durable metal-housed surveillance monitor protected with NeoV Optical Glass screen take advantage of superior components to ensure a long product lifetime.

PID COMMAND & CTRL SOFTWARE

PID Command & Ctrl software allows users to control this 28-Inch 4K surveillance monitor via LAN or RS232 connections. It provides a simple and intuitive interface for remote management, OSD-related settings, and easy control of deployed displays.
