## Fujitsu B2711 TS QHD LED Monitor

The Fujitsu B2711 TS QHD monitor features a user-optimized design, including a right-hand USB hub for optimal cable management, enhancing ergonomics. The factory pre-calibrated display ensures high color accuracy for both single and multi-monitor setups. Retina protection is provided by a low blue light panel, which reduces harmful blue light without affecting color quality. An integrated Autobrightness sensor adjusts the display's brightness to save energy and reduce eye strain.

### Features:

- **27-inch Quad HD Display:** Delivers a resolution of 2560 x 1440 pixels for crisp, detailed visuals.
- **Ergonomic Design:** Includes a 6-in-1 stand base with integrated cable guide and Backpack-support for mini desktop PCs.

It comes in a user-optimized design, as Fujitsu innovated the display housing by offering the worldwide first right-hand USB hub that ensures an optimal cable course. This makes it ergonomically perfect for most users. The factory pre-calibrated display provides high color accuracy for single and multi-monitor usage. Retina protection by low blue light panel that culls damaging blue light without any loss or changes of color. The integrated Autobrightness sensor adapts the brightness of the display to an optimum, saves energy and increases constant productivity due to reduced eye strain.

The integrated presence sensor increases the protection of personal data, activating Windows password lock by temporary user's absence. Its holistic portfolio of interfaces consisting of modern digital (DisplayPort and HDMI) plus legacy interfaces like DVI and VGA, makes the monitor universally applicable.

The 6-in-1 stand base with integrated cable guide and Backpack-support for mini desktop PC's make it to a compact as functional work tool. Focusing on environmental friendliness, the packaging is styrofoam free and solely consisting of cardboard, which is more than 90% recycled. DisplayView™ Software enables you to easily configure your monitor for remote management, administrative tasks

and much more. Prolonged product lifecycle due to firmware updates done by user
