Product description

Often less is more. The new emporiaSIMPLICITY (simple = easy) is a compact keypad phone with a high-quality finish and a stylish design. The SIMPLICITY has no frills. The focus is on what telephones were originally invented for: making phone calls. This works perfectly thanks to three speed dial keys, easy operation, extra-large keys (illuminated, raised and with an excellent pressure point), individually adjustable font size and a wide screen with easy-to-read font. The phone is IP54 certified (dust and splash proof) and is particularly suitable for hearing aid wearers (M4/T4). The back of the phone is equipped with the tried and tested, patented emporia emergency call function, which allows you to call for help quickly and easily. Simply press the button with the heart and the rescue chain is activated. Other functions include an LED flashlight, calendar with reminder function, calculator, alarm clock, vibration alarm and radio. The scope of delivery includes headphones, operating instructions and a replaceable Li-Ion battery.
