PowerWalker VFI 3000 ICR IoT is the next generation of UPS, offering an intuitive app for remote monitoring via cloud. The UPS is quickly setup and easy to maintain, and it provides the ability to review the workflow and troubleshoot instantly - regardless of time and place. This cloud-based monitoring increases the availability and quality of traditional monitoring, while at the same time allowing room for cost reduction, scalability, and trend analysis.

This UPS series utilizes double conversion technology and features unity power factor, ensuring the availability of your mission-critical equipment and providing clean output power to your sensitive loads.
