HiFiMAN Ananda Stealth planar headphones

Close your eyes and let the sounds surround you like a velvet wave - from the subtle murmurs of strings to the intense, pulsating bass. HiFiMAN Ananda Stealth takes the experience of listening to music to a whole new level with Stealth Magnets technology and planar drivers that redefine the concept of sound clarity. The open ear cup design provides a spacious soundstage that makes you feel like you're right in the center of the concert. Sophisticated design and comfort, achieved with an ergonomic headband and pleasantly soft earcups, make the Ananda Stealth the ideal choice for connoisseurs and professionals alike who demand the highest quality audio equipment.

A breakthrough in sound purity

The HiFiMAN Ananda Stealth uses innovative Stealth Magnets, designed to minimize interference from diffraction of sound waves. This allows the drivers to operate at full efficiency, offering pristine sound clarity across the full frequency range (8 Hz - 55 kHz). This technology not only eliminates

distortion, but also produces a harmonious sound that impresses with both detail and naturalness of tone.

Perfection in every detail

At the heart of the Ananda Stealth headphones are drivers with an ultra-thin NEO "Supernano" diaphragm, which is 80% thicker than traditional solutions. The result? Extremely fast response to any sound signal, which allows you to reproduce even the finest musical nuances. As a result, the headphones offer not only impressive dynamics, but also clarity and depth that will enchant the most demanding listeners.

Another dimension of comfort

Ananda means "bliss" or "divine joy" from Sanskrit. The HiFiMAN Ananda Stealth is designed with long-term use in mind. The elongated, asymmetrical earcups perfectly fit the shape of the head, evenly distributing pressure and ensuring comfort even during long hours of listening sessions. Also noteworthy is the headband, which is made of high-quality materials that are a combination of durability and lightweight construction. This is maximum comfort that will literally induce bliss in you.

Impressive frequency response

With a frequency response range of 8 Hz to 55 kHz, the HiFiMAN Ananda Stealth offer sound that goes beyond human perception. Deep, electrifying bass, crystal clear sopranos and rich mids make every recording sound the way the artist intended it to sound. The headphones transport you into a world of music where every detail becomes clear and full of life.

Perfect connection quality

The HiFiMAN Ananda Stealth features a detachable 1.5-mm 3.5mm cable and a 6.35mm adapter, allowing seamless connection to a wide range of devices, including professional equipment. Durable connectors guarantee signal stability, while the use of high-quality materials ensures low resistance and reliability during daily use.
