HiFiMAN Ananda Nano planar headphones

HiFiMAN Ananda Nano are planar headphones created for audiophiles who demand absolute precision and depth of sound. Thanks to the use of an ultra-thin diaphragm of nanometer thickness, the sound gains incredible naturalness. Combined with Ananda Nano's Stealth Magnets technology, they eliminate sound wave interference, guaranteeing exceptionally clear and harmonious sound. Plus a pleasantly soft headband and ear cups, a luxurious design and a premium 3.5mm audio cable. This is equipment that allows you to hear every detail of a recording - from subtle nuances in vocals to the depth of bass in a large symphony orchestra.

Impressive sound spectrum

The frequency response from 5 Hz to 55 kHz opens up a world of sounds that may have previously eluded you. Precise bass, natural mids and detailed highs create an acoustic space that faithfully conveys the character of any piece of music. With an ultra-low impedance of 14 Ω and a sensitivity

of 94 dB, the headphones work perfectly with a variety of audio sources - both portable and desktop.

Nanometer diaphragm

Ananda Nano use an ultra-thin diaphragm measured in nanometers, which is a real breakthrough in acoustic technology. It allows extremely fast and precise movement, which is crucial for faithful reproduction of every sound detail. As a result, the headphones offer extraordinary dynamics and clarity, maintaining natural sound throughout the frequency range. The ultra-thin diaphragm ensures that even the subtlest elements of recordings - the rustling of guitar strings or the resounding echoes in vocals - are reproduced with unprecedented accuracy.

Stealth Magnets Technology

HiFiMAN Ananda Nano also use Stealth Magnets, designed to minimize interference from diffraction of sound waves. This allows the drivers to operate at full efficiency, offering pristine sound clarity. This technology not only eliminates distortion, but also produces a harmonious sound that delights.

Sophisticated design for maximum comfort

The HiFiMAN Ananda Nano is also an example of excellent design that combines functionality with elegance. The headband with optimized design evenly distributes the weight of the headphones, which minimizes fatigue even during long hours of listening. The asymmetrically shaped earcups fit perfectly on the head, providing noise isolation and unparalleled comfort - "Ananda" ultimately means bliss. Thanks to carefully selected materials, the headphones remain lightweight (419 g), and their durability guarantees use for years.

Precise connection and versatility

Included with the Ananda Nano is a 3.5mm audio cable with a length of 3 meters, as well as a 6.35mm adapter for connecting to high-end audio equipment. The connectors are made for durability and signal stability, further minimizing the risk of interference during music playback. The solid connection allows you to bring out the full potential of the headphones both in a home hi-fi system and in a professional recording studio.
