HiFiMAN Arya Unveiled planar headphones

Spread out comfortably and immerse yourself in the music for a longer period of time. HiFiMAN Arya is the quintessence of high-end sound. The use of planar technology and open driver design provides extremely spacious, clear and natural sound. Every detail has been designed for audiophiles who expect absolute perfection in music reproduction. The Arya model combines innovative technical solutions with elegant design to create headphones that will meet the most sophisticated expectations.

Planar drivers - perfect harmony of sound

Arya use nanometer-thick planar diaphragm technology. This results in incredible precision in sound reproduction, eliminating noise and distortion. The headphones offer an impressive frequency response of 8 Hz - 65 kHz, which captures both the lowest bass and the highest tones, preserving their fullness and dynamics. It's technology that makes music sound like you're listening to it live.

Sound space and clarity

Thanks to its open driver design, Arya offers an impressive soundstage. The "Unveiled" system used in the enclosure protects the drivers from damage, while eliminating all reflections and interference found in traditional models, or, though to a lesser extent, those with the "Window Shade" system. The result is a sound of extraordinary depth and transparency, in which every detail rings out with full clarity.

"Stealth Magnets" - sound in its purest form

The unique "Stealth Magnets" are designed to make their presence acoustically "invisible". They minimize the interference of sound waves and allow maximum clarity of sound. As a result, the Arya offer incredible consistency and harmony of sound that will delight any music lover.

Luxury for every moment

Arya is not only about excellent sound, but also about the highest level of ergonomics. The lightweight yet sturdy headband provides a comfortable fit for any head, and the soft earcups made of high-quality materials guarantee comfort even during hours of listening. The design of the headphones is minimalistic, yet sophisticated. This equipment until you want to reach for it.

Versatility of connections and interchangeable cables

The HiFiMAN Arya headphones are equipped with a 6.35 mm crystal copper cable with a length of 1.5 m, ideal for home and studio use. Thanks to the easy interchangeability of the cables, you can also use 4.4mm or XLR connectors, adapting the headphones to your needs and audio equipment.

Open driver protection

Your equipment remains safe even during storage. Dedicated magnetic covers are a clever solution that protects the fully open drivers of HiFiMAN Arya headphones when they are not in use. Thanks to a properly designed construction, these covers protect the delicate components from external damage and the influence of magnetic objects.
