- **Optimized Brightness with Auto EcoView:** Automatically adjusts screen brightness based on ambient light, reducing eye strain and cutting power consumption by up to 50%.
- **IPS Panel with Wide Viewing Angles:** Delivers 178° viewing angles, minimizing color shift and contrast for stable visuals from any perspective.
- **Multiple Inputs:** Includes DisplayPort, DVI-D, and D-Sub inputs for broad compatibility with different graphics boards.
- **Ergonomic Stand:** Offers 100 mm height adjustment, 30° tilt, 70° swivel, and 90° rotation for portrait mode, ensuring comfortable viewing.
- **Blue Light Reduction:** "Paper" mode reduces blue light emission, simulating the look of printed paper for enhanced viewing comfort.
- **Five-Year Warranty:** EIZO's five-year warranty offers extended reliability, reducing the total cost of ownership.
- **Optional LCD Panel Protector:** The FP-1901 protector (sold separately) guards the screen from damage, with anti-glare and glossy sides for optimal viewing.

With its focus on user comfort, energy efficiency, and long-term reliability, the EIZO FlexScan S1934H-BK is an excellent choice for professional and everyday use. Its wide viewing angles and versatile connectivity options make it a valuable addition to any workstation.

EIZO is a Japanese company renowned for manufacturing high-end, reliable display solutions that meet the needs of various industries, including healthcare, business, and creative content creation.

Optimized Brightness with Auto EcoView

The Auto EcoView function is a sensor on the front of the monitor that measures ambient light and optimizes the screen's brightness to a level akin to viewing a sheet of paper under typical office lighting conditions. Since the screen is never too bright, eye strain is reduced while power consumption is cut by up to 50% compared to operating the monitor with Auto EcoView turned off and set to the default factory brightness of 100%.

IPS Panel with Wide Viewing Angles

The IPS (in-plane switching) panel offers 178° viewing angles to minimize color shift and contrast when viewing the screen at an angle. This ensures stable and consistent display when two or more people view the screen at once or in a multi-monitor environment.

Three Inputs Including DisplayPort

DisplayPort, DVI-D 24-pin, and D-Sub mini 15-pin inputs are included for connection with various graphics boards.

Viewing Comfort with an Ergonomic Stand

Adjust the screen to the most comfortable position with 100 mm height adjustment, 30° tilt, 70° swivel, and 90° rotation for portrait mode. A stand with 30° tilt only is available as an option.

Reduced Blue Light

A preset mode called “Paper” adjusts the brightness, contrast ratio, and color temperature to simulate those of printed paper. Paper mode significantly reduces the amount of blue light emitted from the screen for more comfortable viewing.

Built to Last Five Years

EIZO’s five-year warranty is two years or 67% longer than the standard three-year warranty of most brands. Even if the initial purchase price of the FlexScan S1934 is higher than another 19-inch monitor, the TCO (total cost of ownership) will likely be lower due to the significantly longer buying cycle and less need for repair.

Optional LCD Panel Protector

The FP-1901 protector fits easily between the LCD screen and bezel, has a light transmission rate of more than 90%, and includes both an anti-glare coating side to reduce light reflection and a glossy side for crisper, more vibrant images.
