Long-lasting antibacterial treatment

Stay clean, stay healthy

The bezels and hotkeys on VY279HF-W feature an antibacterial ionic silver treatment¹. By preventing bacteria adhesion² by up to 99.9%, it keeps key areas of the monitor clean and hygienic, potentially reducing the spread of harmful bacteria.

VY279HF-W has been subjected to the ISO 22196 Antimicrobial Activity and Efficacy tests conducted by independent testing lab TÜV SÜD.

How Ionic Silver works

Positively-charged silver (Ag^+) ions bind with the cell walls of negatively-charged microbes and bacteria, disrupting their internal functions and killing them off.
