EIZO FlexScan EV2495 24-inch IPS Monitor

The EIZO FlexScan EV2495 is a 24.1-inch monitor designed for streamlined connectivity and exceptional visual comfort. Featuring a USB Type-C connection, it simplifies your workspace by allowing you to display video, playback audio, transmit USB signals, supply power to connected devices, and even transmit a network signal. This multi-purpose connectivity makes it easy to connect your laptop, whether you're moving between workstations or working remotely.

- **USB Type-C Connectivity:** Display video, audio, USB signals, and network signals, while also providing power to connected devices.
- **70 W Power Delivery:** Reliably charges small desktop PCs or laptops, eliminating the need for a separate power supply.
- **Stable Network Connection:** Built-in LAN port for a stable wired connection, accessible via USB Type-C.
- **Peripheral Connectivity:** USB Type-C hub with three USB Type-A and one USB Type-C ports for connecting external devices.
- **Efficient Multi-Screen Setup:** Supports daisy chaining for connecting up to four monitors from a single video signal output.
- **Frameless Design:** Aesthetically pleasing and minimalistic design, available in black or white with matching cables.
- **Versatile Stand:** Offers height, tilt, and swivel adjustments for optimal positioning and comfortable viewing.
- **Auto Brightness Control:** Auto EcoView brightness sensor automatically adjusts the screen to the ideal brightness level.
- **Wide Viewing Angles:** IPS panel with 178° viewing angles minimizes color shift and contrast changes.
- **Blue Light Reduction:** Paper Mode reduces blue light by up to 80%, preventing eye strain when reading documents.
- **Flicker-Free Viewing:** Hybrid solution regulates brightness to eliminate flicker without compromising color stability.
- **Non-Glare Panel:** Reduces eye fatigue by dissipating reflective light.
- **Multiple Connections:** Equipped with USB Type-C, three USB Type-A ports, HDMI, and DisplayPort inputs.

EIZO is a Japanese company known for manufacturing high-end display solutions, offering exceptional image quality, reliability, and ergonomic design for professional and personal use.

audio, transmit USB signals, supply power to connected devices, and even transmit a network signal. This convenient multi-purpose connectivity makes it faster and easier to connect your laptop when moving between workstations or working away from the office.

70 W Power Delivery

The 70 W power delivery via USB Type-C reliably charges small desktop PCs or laptops such as a Microsoft Surface. This eliminates the need for a laptop's bulky power supply unit, freeing up space in your bag and on the desk.

Stable Network Connection

While many modern laptops are not equipped with a dedicated LAN port, the monitor has one directly built in for a stable wired connection. Connecting any laptop via USB Type-C allows access to the network through the monitor. This allows you to conduct conference calls or data transfers reliably and at high speed.

EIZO MAC Address Clone Utility software temporarily assigns the MAC address of a connected PC to the monitor, granting network access to authenticated devices, and preventing network access from unauthenticated devices.

Connecting Peripherals Directly

While modern laptops are becoming thinner and more portable, they often have limited connectivity options for peripherals. Connecting to the monitor via USB Type-C gives access to a hub with three USB Type-A and one USB Type-C ports for easily connecting an external keyboard, mouse, or web camera.

Efficient Multi-Screen Setup

The monitor's USB Type-C connection supports daisy chaining for easily connecting multiple monitors from a single video signal output. This allows you to effortlessly connect up to four screens and quickly view multiple applications simultaneously for boosting efficiency.

Aesthetically Pleasing Design

A monitor's aesthetic can go a long way in creating a more comfortable atmosphere. The monitor's minimalistic design and its ergonomic functions allow it to fit naturally in your work environment, whether you are at home or in the office.

Frameless and White

The monitor implements a virtually frameless design for a minimalistic aesthetic. In addition to sleek black, the cabinet is available in white for a color option that keeps your workspace feeling bright. Furthermore, EIZO provides white cables to match the cabinet for full color coordination.

Versatile Stand for Optimal Positioning

The stand has a wide adjustment range, featuring height adjustment, tilt and swivel. This allows the user to set the monitor to the perfect position. At maximum height, the user can also comfortably place a small laptop under the screen to save space in even the most limited workspaces.

Furthermore, a high native resolution of 1920 x 1200 shows 11% more content than a conventional monitor with a full HD (1920 x 1080) resolution, reducing the need for frequent scrolling in some applications.

Say Goodbye to Tired Eyes

The monitor is equipped with functions to help users concentrate on work by keeping their eyes comfortable throughout the day.

Auto Brightness Control

To prevent eye fatigue, a brightness sensor called Auto EcoView detects the changes in the ambient brightness that occurs throughout the day and automatically adjusts the screen to the ideal brightness level.

Clear View from All Angles

The monitor uses an LED-backlit IPS (in-plane switching) LCD panel with 178° viewing angle that minimizes color shift and contrast changes when viewing the screen at an angle. This means that two people sitting at the one computer can easily see the screen with high image quality.

Reduce Blue Light by 80%

In the visible light spectrum, blue light has wavelengths adjacent to ultraviolet light. Compared to the factory preset setting of 6500 K of typical LCD monitors, Paper Mode is closer to the spectral distribution with long reddish wavelengths so it reduces the amount of blue light, a cause of eye fatigue, and helps prevent eyestrain when reading documents. When used in conjunction with Auto EcoView dimming function, blue light can be reduced by as much as 80%.

Flicker-Free Viewing

Due to the way brightness is controlled on LED backlights, a small number of people perceive flicker on their screen which causes eye fatigue. The FlexScan EV2495 utilizes a hybrid solution to regulate brightness and make flicker unperceivable without any drawbacks like compromising color stability – even on low brightness settings.

Minimum Brightness of 1 cd/m²

In a dimly-lit work environment, a monitor with low brightness settings is more comfortable to use. With its LED backlight, the monitor is adjustable to approximately 1 cd/m² which is less than 1% of the maximum.

Non-Glare Panel

A non-glare panel reduces eye fatigue by dissipating reflective light that would otherwise make the screen difficult to view from different positions.

Additional Features

The monitor offers additional features and functions for promoting efficiency and comfort.

Multiple Connections

The monitor is equipped with a USB Type-C and three USB Type-A ports for easily connecting to multiple devices without the need for a docking station. This is convenient when using a laptop with limited USB ports or for streamlining connection to workstations in hot desking or home office environments. The monitor also has HDMI® and DisplayPort inputs for further flexibility.
