### AXAGON HMC-H3A

The multi-port USB-C 5Gbps **AXAGON HMC-H3A STARTER 4in1 hub** expands your laptop, computer or phone **with four ports**. Connect your laptop to the hub via a 15 cm long USB-C cable. You immediately have connectors to connect a **monitor and three USB devices** at the same time.

The USB hub offers **three USB outputs**, two with **USB-A 480Mbps** and the third with **USB-A 5Gbps**. Transfer rate is up to 5Gb/s thanks to USB 3.2 Gen 1 interface. The hub can also handle permanent connection of several external drives simultaneously.

**The HDMI output** enables the connection of an external monitor, TV or projector with a resolution of up to **4K/30Hz** Ultra HD, **2K/60Hz** Quad HD or **1080p/120Hz** Full HD and the transmission of multi-channel audio.

**The compact and slim aluminium body** not only looks great, but also provides mechanical durability and **passive cooling**. You will also be pleased with the finely textured surface, which does not leave fingerprints.

USB-C hub is an ideal accessory **for laptops without USB-A connectors and video output**. You can use your current USB peripherals without having to purchase new ones. Thanks to the **Plug and Play** and **Hot Plug** functions, connecting the hub itself is very simple without complicated installation, and peripherals can also be easily connected and disconnected while the computer is running.

For the hub to function properly, your laptop's USB-C port must support video output (DisplayPort Alternate Mode or Thunderbolt 3, 4 and above).

The hub can easily **connect to phones** with a USB-C connector. For example, you can connect a flash drive, keyboard, mouse, display, TV or projector to the phone.

#### **Input (computer, tablet or phone connection):**
