473.99€

The Compact AURZEN Boom Projector

The AURZEN BOOM mini Case Bundle is a compact multimedia projector designed for convenient viewing of content on a large screen, whether at home or outdoors. The device runs on Google TV, providing direct access to thousands of streaming apps without the need to connect additional devices. The projector offers 500 ANSI lumens of brightness and HDR10 technology to enhance contrast and image detail. The use of ToF technology enables automatic focusing and real-time image correction, allowing the device to be set up in just a few seconds. The package is rounded out by built-in 20W speakers with Dolby Audio support and extensive wireless connectivity options.

Built-in Google TV system and access to thousands of apps

The projector is equipped with the official Google TV system, which allows you to use over 10,000 apps and streaming services, such as Netflix, YouTube, Disney+, and Hulu. This means you don't need to connect an additional device like a TV Stick. The built-in 2 GB of RAM and 16 GB of internal

storage ensure smooth app performance and stable content playback.

Full HD image with 4K signal support

The AURZEN BOOM mini projector uses a panel with a native resolution of 1920 × 1080 (Full HD). The device supports 4K input via HDMI, but the image is displayed at its native 1080p resolution. According to the manufacturer, playing 4K content requires connecting an external device, such as a TV stick or media player. The source device then downscales the 4K content to 1080p before sending the signal to the projector. This solution allows you to enjoy 4K content available on streaming services while maintaining compatibility with the projector's Full HD display.

Automatic image adjustment in 3 seconds

The projector uses ToF (Time of Flight) technology, which enables automatic focusing and real-time keystone correction. The system operates in approximately 3 seconds and responds even to slight movements of the device, keeping the image sharp and properly aligned with the projection surface at all times. Automatic screen alignment and obstacle detection features further simplify setup.

Built-in 20 W audio system with Dolby Audio

The projector features a dual 20 W speaker system with Dolby Audio support. The Visible Sound design with a rear speaker layout delivers clear highs and deep bass with minimal distortion. This allows the projector to also function as a standalone Bluetooth speaker.

Adjustable design and user comfort

The projector's housing is designed with a tilt angle of up to 110°, allowing you to easily adjust the projection direction to suit the device's placement. Soft light diffusion technology reduces eye strain during extended viewing, making the projection experience more comfortable than watching traditional TV.

Extensive connectivity options

The projector supports two-way Bluetooth, allowing it to function as both an audio source and a speaker. Dual-band Wi-Fi (2.4 GHz and 5 GHz) ensures stable image transmission and fast access to streaming services. The Google Cast feature enables wireless content streaming from Android and iOS smartphones.

Included

- Projector
- Remote control (batteries not included)
- Power adapter
- User manual
