Titanium expansion cage with handle and additional connections Puluz for DJI Osmo Action 6

The Puluz Titanium Expansion Cage for DJI Osmo Action 6 is an accessory created for creators who want to squeeze the maximum out of their camera - without compromising on ergonomics, safety and comfort. It combines rugged aircraft-grade aluminum construction, a comfortable grip, smart magnetic solutions and additional connections that open the way to more advanced shots. It's a tool that not only protects the camera, but realistically enhances the recording process - in the field, on

the move and in dynamic scenarios.

Robust design that works with you

The cage was designed specifically for the DJI Osmo Action 6, so it fits perfectly to the camera body, protecting it from scratches, bumps and the effects of falls. The high-grade aircraft-grade aluminum alloy provides rigidity and resilience, while the soft, non-slip grip lining keeps the camera securely in your hand even during long recording sessions. The ergonomic design reduces hand fatigue and allows you to focus solely on the frame.

Magnetic convenience and quick configuration change

The use of a magnetic quick-mount mechanism makes switching between different recording scenarios instant and intuitive. Without unnecessary tools, you can mount the camera to a tripod, selfie stick or other accessory, adjusting the set up to suit your current needs. The cage's clever design allows you to change the battery and charge the camera without removing it. As a result, your camera remains securely seated in the cage, and you save time and eliminate the risk of accidental damage to your equipment.

Precise response and more expandability

The integrated shutter button provides a clear, instantaneous response when pressed, allowing you to capture dynamic moments without delay. A direct cold shoe connector allows you to quickly connect additional accessories such as a microphone or lighting, making the Puluz cage an ideal choice for more professional video shoots as well.

Clear screen in all conditions

The magnetic sunshade effectively reduces reflections and interference caused by strong light, significantly improving screen visibility. This makes framing and controlling the shot comfortable even in bright sunlight. The whole thing remains lightweight and portable (it weighs just 183g) so it doesn't weigh down the kit and is great for traveling.
