### DARKFLASH DK431 Glass computer case (black)

With the Darkflash DK431 Glass computer case, you can easily create a hardware configuration that will allow you to play games or work comfortably. The product is equipped with various ports, such as USB 3.0 and 2.0, and is made of high-quality materials. The transparent panels not only make it easier to replace components, but also allow for interesting visual effects, for example in combination with RGB fans.

### Stylish and functional

The side panel of the case is equipped with practical hinges, so you can easily open it to replace components or clean the equipment. What's more, both the side and front panels are made of tempered glass, which allows you to display the elements inside, such as those with colorful

backlighting. In addition, a special silk handle makes them easy to open.

## Optimal cooling system

Play dynamic games and be sure that your computer will not overheat. The DK431 allows you to install up to 12 120 mm fans or 8 140 mm fans. There are also ventilation holes on the side panel for even better heat dissipation. What's more, you can install 360 mm water cooling in the top or front of the case. Note: it is not possible to install fans on the right side and water cooling at the front of the case at the same time.

## More expansion options

The case allows you to install up to 4 hard drives, so you don't have to worry about running out of space for your photos or videos. It is ideal for graphic designers and photographers, among others. It also allows you to install a 400 mm VGA card and a 160 mm high CPU cooler. The carefully thought-out design and practical cable grommet allow you to optimize your space. The DK431 also has a removable dust filter to help you keep your components in good condition.

## A range of useful ports

Create a hardware configuration that is comfortable for you to use. The DK431 Glass case is equipped with several useful ports and buttons that will make your work much easier. Among other things, you have a microphone input and headphone/speaker output, 2 USB 2.0 ports, as well as Reset and Power buttons. There is also a USB 3.0 port, which allows you to quickly charge connected devices and transfer files at lightning speed.
