### 2.5 Times of 1080P with Our Widest FOV Yet

Outstanding image quality with a high resolution of 2592x1944 captures license plates, road signs, and other critical details on the road. With the 70mai app, you can view real-time footage directly on your phone.

An extra wide 170° field of view better records actions on both sides of your car—where collisions are most likely to occur.

### Powerful Night Vision

With HDR\* imaging and a F2.0 large aperture that pulls in more light, the M500 ensures crisp, well-illuminated images in low-light and high-contrast environments by automatically adjusting exposure and reducing noise.

### 24-Hour Parking Surveillance with Car Battery Protection

Your car is in good hands while you're away. If the built-in G-sensor detects any sudden shakes or

collisions, the M500 will automatically start recording to capture any potential incidents. If an emergency video is recorded, the dash cam will notify you with a voice alert after it's turned back on.

With car battery protection, you won't have to worry about the dash cam draining your car battery while your car is parked.

### **Time-Lapse Recording**

Time-lapse recording enables true 24-h parking surveillance: every 30 minutes of footage is compressed into one minute, so you can keep your camera on all night\*\* without using too much storage space. With faster playbacks, you can catch noteworthy events quickly, too.

### **Expanded Advanced Driver-Assistance Systems (ADAS)**

Act ahead with ADAS: it detects your surroundings and voice alerts to safety concerns. The M500 comes with expanded ADAS alerts include lane departure, forward collision, moving traffic, and pedestrian collision.

Notably, the pedestrian collision AI algorithm enables quick and accurate detection of both pedestrians and cyclists within the M500's field of view and gives you timely warnings to prevent accidents.

### **More Stable GPS & GLONASS Positioning**

The M500's positioning system receives signals from both GPS & GLONASS satellites, enabling stable and accurate positioning even in areas prone to signal obstruction. Trip data\* includes time, speed (km/h, mph), and coordinates—crucial for roadside assistance and insurance claims in case of an accident.

### **No Memory Card**

With the eMMC 5.1 built-in storage, you no longer need a separate memory card. The M500's maximum read/write speeds of 230MB/s and 150MB/s also help you avoid common issues such as frame-skipping and memory card errors.

### **Enhanced**

## **Accuracy**

Using Bluetooth signals, sensors' automotive-grade chips are highly resistant to frequency interference and give you more accurate data.

## **Dust & Water**

### **Resistance**

With IP6K6K dust & water resistance grade, the sensors are designed to endure outdoor dusts and heavy rain and give you peace of mind.

## **Withstand Extreme**

### **Temperatures**

Sensor batteries can withstand temperatures from -20°C (-4°F) to 80°C (176°F), ensuring optimal sensor performance and at least 2 years of use.

## **A Breeze to Install**

Each TPMS sensor only weighs 13g (approx. 0.46 oz) and does not affect the dynamic balance of your car. It only takes a few minutes to install them on or remove them from all four tires, making it easy for you whenever you need to change tires or drive a new rental car.

## **Free Your Hands with Voice Control**

Nobody enjoys multitasking while driving. You can directly give voice commands to control your dash cam as long as it is turned on, whether you want to take a photo or start recording.

## **App Control**

Connect to the 70mai App via the built-in Wi-Fi and check real-time footage without using up your phone's data. You can also adjust recording duration and other settings, take and download photos and videos...all at your fingertips!

## **Loop Recording**

Loop recording gives you practically unlimited storage space, as new recordings will automatically overwrite\* older footage when the memory card reaches full capacity.

## **Sample Footage Gallery**
