

Roborock Q7 TF cleaning robot (white)

Modelis: Q7TF02-00

Gamintojas: ROBOROCK

EAN: 6936905902849

Prekės kodas: 464743

159.99€

Roborock Q7 TF cleaning robot (white)

Roborock Q7 TF is a powerful cleaning robot that offers suction power of up to 10,000 Pa, thorough floor mopping and LDS navigation system. Its added advantage is the specially designed brushes, whose design prevents hair entanglement. The device also has a large 400 ml dust tank and is compatible with the Roborock app, which allows you to use many useful features. This is your new way to pristine floors!

Fast dirt removal

The robot is distinguished by a suction power of up to 10,000 Pa. Thanks to this, it will deal with even difficult dirt in no time - it will quickly remove dust, crumbs and even hair or dander. So it will be an excellent choice for parents of small children, pet guardians and more!

Brushes that do not tangle hair

Cumbersome and time-consuming brush cleaning? Not with Roborock Q7 TF! Its V-shaped main brush is equipped with rubber elements, bristles and a small JawScrapers comb. This solution effectively prevents hair from tangling in it and guarantees efficient vacuuming. Also the side brush of the robot does not generate problems. It is distinguished by its asymmetrical design, elongated bristles and soft rubber parts, so hair does not stick to it and quickly lands where it should!

It will clean the floors for you

The robot's mopping module is easily detachable - when you don't need it, just remove it! The device thoroughly cleans floors, removing even stubborn stains - it can handle spilled juice or mud applied by your dog after a walk. You can also choose from 3 levels of water flow to adjust the intensity of mopping to the current situation. What's more, the robot's mopping pad is very easy to clean.

Precise navigation

The LDS navigation system means the robot can quickly map rooms and plan optimal cleaning routes. The device remembers up to 3 floor maps, which means it will work well in both small and large homes. Roborock Q7 TF also automatically detects areas that could contribute to potential problems, such as stairs or the space between chair legs, and then prompts it to set up No-Go zones in these areas, which it will not access. All this translates into efficient and safe work!

Discover the features available in the Roborock app

The Roborock app allows you to conveniently manage your robot's operation and offers many useful features to optimize its performance. With just a few clicks, for example, you can direct it to re-clean a selected area or select the option to clean along floor joints, which prevents scratching and guarantees greater precision. You can also enable automatic power boost on carpets or the DEEP+ mopping mode, which allows you to clean surfaces even more thoroughly.

Included

- Moisture-resistant mat
