### Roborock Qrevo Edge 5V1 cleaning robot (white).

Choose a device that combines advanced technology with superior precision and performance. Roborock Qrevo Edge 5V1 is equipped with an innovative Dual Anti-Tangle system that effectively eliminates the problem of tangles, resulting in efficient and hassle-free cleaning. Thanks to HyperForce's suction power of 18,500 Pa and FlexiArm technology, the robot reaches hard-to-reach places, providing comprehensive cleaning of any surface. In addition, it overcomes obstacles up to 2 cm high, which increases its mobility. Intuitive control via a mobile app allows full control of the device's operation and customization.

### Dual Anti-Tangle System

The Roborock Qrevo Edge 5V1 is equipped with an advanced anti-tangle system, which significantly reduces the risk of clogged brushes and affects their longer life. The main DuoDivide brush, with two parallel rollers, effectively directs hair straight into the dust container, while the side brush, with its asymmetrical design and centrifugal force, prevents hair from getting caught in the mechanism. A built-in brush at the multi-directional wheel automatically removes debris, ensuring uninterrupted operation of the device and maintaining optimal cleaning performance.

### **Suction power of 18,500 Pa - uncompromising efficiency.**

The robot offers an exceptional suction power of 18,500 Pa, which allows it to thoroughly remove dirt from both hard surfaces and carpets. By automatically increasing the power on carpets, the robot removes up to 99.5% of hair and dirt. With FlexiArm technology, the robot extends the side brush and mop to effectively reach corners and hard-to-reach areas as well, ensuring perfect cleaning in every nook and cranny.

### **Advanced mopping system**

The Roborock Qrevo Edge 5V1 cleaning robot is equipped with two rotating mops that work at 200 revolutions per minute, effectively removing even dried dirt. A 30-degree adjustable humidity level allows you to adjust the cleaning intensity to suit your personal preferences. The built-in water tank keeps the mops properly moist, eliminating the problem of them drying out during operation. In addition, the 10mm automatic mop lift system prevents accidental wetting of carpets, allowing you to switch seamlessly between cleaning modes.

### **Multifunctional docking station - full automation**

The version 3.0 docking station not only provides charging for the robot, but also significantly reduces the need for manual maintenance. Washing the mops with 75°C hot water effectively removes dirt and eliminates bacteria, while an intelligent dirt level detection system analyzes the condition of the mops and performs additional cleaning if necessary. The integrated automatic dust bin emptying function minimizes user contact with dirt, while the warm air mop drying system effectively reduces moisture, preventing the multiplication of bacteria and the formation of unpleasant odors.

## Intelligent navigation and quiet operation

The advanced Reactive Tech system and Structured Light technology enable the robot to accurately detect obstacles and effectively avoid them. The robot identifies even small objects, such as wires, small objects or pet bowls, allowing it to move safely and smoothly around the room. In addition, thanks to its optimized design, the robot operates extremely quietly (55 dB), without interfering with daily activities.

## Full control and personalization of cleaning

Operation of Roborock Qrevo Edge 5V1 is extremely intuitive thanks to support for a dedicated app. The Roborock app allows for live viewing, designating cleaning zones and customizing cleaning schedules. A special emergency cleaning mode allows you to quickly remove sudden dirt, such as spilled liquids or spilled food, without interrupting the main cleaning cycle. The Vacuum Carpet First function ensures that carpets are thoroughly vacuumed before mopping, eliminating the risk of getting them wet. In addition, you can configure room maps, set forbidden zones and define individual cleaning scenarios, allowing you to fully optimize the device's performance according to your needs.

## Included

- cleaning robot
- docking station with dust bag
- mopping pads
- holders for mopping pads
- Additional dust bag
- power cord
- user manual
