The explosion of colours

HDR TRUE BLACK 400 makes every scene, whether bright or dark, come to life with its realistic details with a 1.5M contrast ratio. Immerse yourself in playing with the more vibrant world created by DCI-P3 98.5% (Typ).

[Tip] The way to enjoy a brighter OLED gaming?

To enjoy a brighter OLED experience in the gaming environment, turn off the Smart Energy Saving mode.

Show only your game

Applying Anti-Glare & Low Reflection technology can provide a better viewing experience anywhere by reducing screen distraction even in the surrounding lighting environment.

Lightning speed OLED

LG's new UltraGear™ monitor delivers the ultra-fast speed of 240Hz refresh rate and 0.03ms (GtG) response time on the OLED display.

Incredible speed, OLED 240Hz refresh rate

A fast speed of 240Hz allows gamers to see the next frame quickly and makes image to appear smoothly. The gamers can response rapidly to opponents and aim at target easily.

Extremely fast 0.03ms response time

With 0.03ms (GtG) response time, reducing reverse ghosting and helping objects render clearly, let you enjoy the game with smoother movement and surreal visual fluidity.

Amplify your gaming output with OLED display

27GS95QE is capable of up to 240Hz refresh rate from HDMI 2.1. It means gamers can fully enjoy QHD resolution and 240Hz either by DisplayPort or HDMI.

Gamer-centric design

Enhance your gaming experience with a new Hexagon lighting and 4-side virtually borderless design. The adjustable base supports swivel, tilt, height, and pivot helps you play games more comfortably.

Set and control at once

With UltraGear™ remote control, you can conveniently set and control your monitor by turning it on or off, sound adjusting, changing mode, and others.

Plugin for immersive sound effect

Enjoy your games while having voice chat by connecting easily with 4-pole headphone out. Also, you can feel even more immersive with virtual 3D sound with DTS Headphone :X.

Award winning gaming GUI

Gamers can use On-Screen Display and OnScreen Control to easily customize the setting from adjusting basic monitor options to registering 'User Defined Key' that user can set the shortcut.

Protect your display with OLED Care

OLED Care help to prevent the after image, display burn-in, that occurred when it change the new picture after a static high-contrast image was displayed for a long time.

Accurate colours updated

Optimize colour performance by using hardware calibration through the LG Calibration Studio, making the most of LG QHD OLED display's wide colour spectrum and consistency.
