### EMEET OfficeCore M2 Max Conference Speaker

The EMEET OfficeCore M2 Max is a conference speaker designed for everyday teamwork—in the office and in hybrid work settings. The device captures sound in a 360° range from up to 5 meters away, uses 48 kHz sampling, and features VoicelA® technology, which improves speech clarity. In practice, this means that everyone at the table is clearly heard, and the conversation remains natural and clear. The device works immediately upon connection, supports wireless mode, and offers scalability, making it suitable for both individual workstations and medium to large conference rooms.

The OfficeCore M2 Max is equipped with four high-sensitivity directional microphones that capture sound from all directions. This allows meeting participants to speak freely without having to change their position or lean toward the device. The high 48 kHz sampling rate translates to more accurate voice reproduction, which makes it easier to understand what is being said and reduces fatigue during longer conversations. The positioning system detects the active speaker, and an illuminated ring indicates the direction from which the voice is coming, making it easy to control the flow of the meeting.

## Noise reduction and clear, uninterrupted communication

VoicelA® technology focuses on the human voice, amplifying it while reducing echo and ambient noise. The suspended microphone chamber design reduces desk vibrations and interference generated by the speaker itself, further improving audio quality.

## Clear sound throughout the room

The built-in 5 W speaker, with a volume of up to 89 dB, has been tuned for human speech, so the sound remains clear even for those sitting further away. There's no need to crowd around the device to hear the conversation clearly. You can connect the device via USB-C and start working right away, or use Bluetooth to connect two devices simultaneously. The built-in battery increases mobility, and the ability to daisy-chain two units allows you to better tailor the sound system to larger meetings.

## Compatibility and Convenient Setup

The EMEET OfficeCore M2 Max works with popular operating systems and video conferencing platforms, so you can easily adapt it to your current work environment. The EMEETLINK app allows you to change settings such as standby time, Bluetooth name, and software updates.
