- ✓ Up to 3mm cutting depth
- ✓ Fully automatic blade
- ✓ 11.7" (297mm) width cutting area
- ✓ Wireless LAN connectivity
- ✓ Precise, faster, quieter cutting

Aprašymas

Scan it. Convert it. Cut it. Create it! Enter the creative world of ScanNCut, the only home and hobby cutting machine with a built-in scanner. No more cutting dies, no need for a PC. The ScanNCut is a totally standalone electronic cutting machine. Create and edit directly on the LCD touchscreen - the possibilities are virtually endless.

Creativity at your fingertips - The ScanNCut SDX900 is the ultimate electronic cutting machine.

Spend less time on laborious hand cutting, and spend more time on being creative! With the ScanNCut SDX900 you can scan in any image or hand drawing using the 600dpi built-in scanner, and then precisely cut the shapes and outlines. All in a few simple steps. You can even edit the design onscreen - enlarge, reduce, mirror, weld, duplicate... the options are endless.

Cut materials up to 3mm thick with the fully automatic blade - no need to fiddle with pressure settings. The auto blade automatically detects the thickness of your material and adjusts the pressure automatically, eliminating guesswork and miscuts.

The SDX900 comes with 682 built-in designs and 7 fonts. Create your own unique designs either onscreen, or with our free software CanvasWorkspace.

Expand your craft even further by adding premium functions and other accessories, like the roll feeder, rhinestone kit, paper piercing, embossing

and much more. Additional design collections, like Tattered Lace and Disney ranges are also available additionally.

For in-depth information on ScanNCut uses, try our FAQ Support Page and our video gallery section or start your creative journey by having a look at our free projects.
