Unmatched Speed with GDDR7 Memory

The RTX 5070 stands ready to tackle demanding titles and complex rendering tasks. Equipped with 12 GB of revolutionary GDDR7 video memory, this card delivers significantly higher bandwidth and efficiency compared to previous generations, pushing frames faster and supporting massive texture loads required by modern AAA games.

Factory Overclocked Twin X2 Cooling

The INNO3D Twin X2 design provides efficient thermal management to keep performance optimized even under heavy loads. Featuring a robust dual-fan configuration, the Twin X2 cooler ensures reliable heat dissipation. This specific model is factory overclocked (OC), providing enhanced clock speeds right out of the box for immediate, superior performance without manual tuning.

Key Features:

- Powered by the next-generation NVIDIA GeForce RTX 5070 architecture.
- Massive 12 GB of cutting-edge GDDR7 video memory for extreme speed.
- INNO3D Twin X2 thermal solution ensures effective and reliable cooling.
- Factory Overclocked (OC) for elevated performance and gaming responsiveness.
- Ideal for high refresh rate 1440p and immersive 4K gaming experiences.

INNO3D is recognized globally for manufacturing high-quality graphics cards, consistently delivering powerful performance solutions for the gaming community and professional users. Their focus on custom cooling and optimized factory overclocks ensures maximum stability and speed.
