Telesin smart swivel tripod for sports cameras / phones (TE-GPYT-001)

The modern tripod by Telesin gives you a range of new possibilities when recording. Rotating 360° and offering a smart tracking function - it will allow you to create exactly the shots you want. The built-in HD camera provides excellent image quality, and a runtime of up to 5 hours guarantees the freedom you dream of. With the included remote control, you can remotely control the tripod. What's more, the 1/4 threads allow you to mount additional accessories.

Effectively keeps the person being filmed inside the frame

The tripod rotates 360° and intelligently follows your filmed subject. Its optimal operating range is from 1m to up to 8m. This makes it suitable for a multitude of applications. You will use it during an

online meeting, a webinar, recording tutorials, and even when you are selling various kinds of products over the Internet. The advanced algorithm enables real-time tracking, which also allows you to conduct live broadcasts.

Mount additional accessories and enjoy more convenience when recording

There are universal 1/4 threads on the top and bottom of the device, with which you can mount additional accessories. Tripod, lighting, camera, phone or camera adapter, or maybe a microphone? The possibilities are almost endless. What's more, you can adjust the threads to give the attached accessories the stability you need.

Create without worrying about discharging your device too quickly

The tripod is equipped with a durable 1500 mAh battery. It allows up to 5 h of recording after one complete charge, which takes about 2 h. What's more, you don't have to worry about prematurely discharging the device if you forget to turn it off. The tripod automatically goes into sleep mode after 15 minutes of inactivity.

HD panoramic camera - even more applications

The device's built-in HD camera can also serve as a webcam. The device is compatible with most laptops of popular brands. So you can enjoy excellent quality video calls with friends, family or colleagues! To use this feature, you need an adapter.

Discover the advantages of remote control

You will also find an easy-to-use remote control, which will make your work with the smart tripod even easier. With its help, you can conveniently control the device from a distance. You will not only turn it on or off, but also activate the tracking function. You will also gain the ability to control the tripod's rotation.
