51.99€

Telesin Dome Port underwater housing for GoPro Hero 13 / 12 / 11 / 10 / 9 (GP-DMP-T09)

The practical housing by Telesin designed for the GoPro Hero 13 / 12 / 11 / 10 / 9 camera will allow you to take original shots above and below the water. Not only can it float above water, but it is also waterproof to a depth of up to 30 meters. It provides a wide field of view and a light transmittance of 93%. There is also a storage compartment inside its non-slip handle where you can store small items.

Create breathtaking underwater shots

The dome of the housing is made of German acrylic glass, which stands out for its durability, perfectly protects the device, and provides clear, clean images. The distance between the lens and its top is 70 mm, which provides an optimal view. The accessory is equipped with special elements that prevent it from evaporating. Using it, you also do not have to worry about reflections interfering with the quality of photos and videos. What's more, the 180° field of view allows you to create great shots.

Reliable and multifunctional

You can use the housing in several different ways. Responsible for this multifunctionality of the accessory are its buoyancy mount and water resistance up to a depth of 30 meters. The product allows you to record unique footage on land, as well as just above the surface of the water. With its help you will also take amazing underwater shots.

Practical grip

The non-slip grip of the housing is made of pleasant-to-the-touch TPE plastic. It allows you to use the accessory with confidence and comfort both on land and underwater. Inside it is a small storage compartment, where you can store, for example, keys or coins. You can also fill it with water to keep it optimally buoyant in any situation.

Carefully thought-out design

Installation of the case is fabulously easy, as is its use. The accessory is equipped with a shutter button, so you can take stunning shots in no time. The stainless steel components are durable and resistant to wear and tear. In addition, the adjustable-length wrist grip increases the security of the case's use and helps prevent it from getting lost.

Contents of the kit

- buoyancy rod
- dome
