The CORSAIR Nautilus 360 RS processor liquid cooling system is designed to maintain optimal operating temperatures for a range of processors. Equipped with three 120 mm fans, this system provides a robust air flow of 94.87 cfm while operating at a noise level of 33.2 dBA. Features such as Pulse-width modulation (PWM) support and Air-Guide technology work together to enhance cooling performance, ensuring that the system remains quiet and efficient even under heavy loads.

Compatibility is ensured, as it works with Intel's LGA1700 and LGA1851 sockets, and AMD's Socket AM4 and AM5. The 360 mm aluminum radiator dissipates heat, while the copper heatsink ensures effective thermal conductivity. The included mounting kit makes installation straightforward.
