- ✓ Supports AP Controller (APC) version 3.60 or later
- ✓ 802.11ax Wi-Fi 6 AP and WPA3 support
- ✓ 802.11k/v/r support

Aprašymas

Giving great convenience and improving the connection security

WPA2 Enterprise can authenticate remotely connected devices or individuals and has a very rigorous and safe authentication method, which is not easy to be broken by malicious users. Supports dynamic VLAN giving users great convenience and greatly improved security.

Simplify the User Experience

To streamline the user experience, Secure WiFi collaborates between the remote access points and headquarter gateway by eliminating repetitive 2FA logins, which substantially helps IT securely and easily extend the corporate enterprise network without hassle

Leveling up the Productivity

By eliminating unwanted broadcast storms, we help businesses optimize bandwidth usage, resulting increased productivity and workflow.
