released a new A2 standard (Application Performance Class 2), allowing SPEED PLUS microSDXC memory cards to provide a minimum random read speed of 4,000 IOPS and a minimum random write speed of 2,000 IOPS. This standard also optimizes the access and loading time of system applications, handles multiple simultaneous commands, and saves power.

Ultra-clear Dynamic Recording with No Frame Drops

The SPEED PLUS microSDXC memory card adopts UHS-I U3 high-speed specifications and V30 recording speed levels, supports high-definition motion image processing such as Full HD, 3D surround view, and 4K Ultra HD, and can maintain a minimum write speed of 10MB per second in a stable manner, faithfully recording every wonderful moment and making professionals more professional.

Durable and Reliable Data Protection

The SPEED PLUS microSDXC memory card features an SSD-level LDPC (Low-density parity-check code) automatic error correction function and has passed water resistance, shock resistance, X-ray resistance, anti-static, and high temperature and extreme cold resistance tests to offer the best protection for important data.
